Management's Discussion and Analysis

Business Review

In 2012, the European debt crisis and the lingering weakness of external environment continued to weigh on the global economy. The local economy has been constrained from these severe challenges and grew at a modest pace. In spite of this, with the strong support from the Mainland, where the economy continued to grow in this turbulent period, Hong Kong economy has sustained a stable development.

During 2012, the operating environment for Hong Kong's banking industry remained tough. The sluggish global economic conditions weakened the demand for loans and financial services, as well as the sentiments of trade and investment. Banks were faced with intensifying competition while low interest rate environment continued to constrain the improvement of banks' net interest margin. It became more difficult to maintain profitability. In view of the complex and uncertain operating environment, the Group has continued to take proactive yet prudent business strategies in order to maintain the Group's momentum of growth and provide high quality banking services.

In a persistently low interest rate environment, the Bank consolidated its core customer base with high quality services and actively introduced various kinds of deposits products in response to the needs of different customers. In order to cater for financing needs of individual and corporate customers, the Bank has offered comprehensive financing products, such as personal loans, mortgage, operating cash flow financing, capital expenditure financing, etc.

The Group's core businesses are to provide personal and corporate banking and other related financial services. In the Personal Banking business sector, we have enhanced our wealth management products and services in order to better meet the different needs of our personal customers in this low interest rate environment. For the Corporate Banking business, we have upgraded our deposits, loans and cross-border services, especially in broadening our service platform for RMB loan products. Moreover, the Bank has participated actively in the "SME Financing Guarantee Scheme" launched by the Hong Kong Mortgage Corporation Limited to enhance its SMEs services.

With an all-rounded Commercial Banking Centre and 24 branches in Hong Kong, together with 2 branches and 2 sub-branches (Xiamen Guanyinshan sub-branch commenced operation in December 2012) in Mainland China, the Bank has further enhanced its branch network to provide cross-border integrated banking services to our customers for fulfilling their needs in wealth management and capital financing.

In view of the increasing business risk, the Group has stepped up to enhance the efficiency of its internal control mechanisms and risk management measures in order to maintain a robust growth.

年內淨利息收入為港幣 923,737,000 元,較二零一一年增加 2.22%。淨利息收益率較去年下降 3 個點子至 2.11%。淨服務費及佣金收入為港幣 239,581,000 元,較去年減少 10.84%。在剔除收回雷曼兄弟相關產品支出影響後,經營支出為港幣 339,576,000 元,較去年增加 2.72%,而成本收入比率則較去年上升 1.00%至 27.43%。

前景展望

展望二零一三年,環球經濟環境仍然複雜多變,香港銀行業的經營仍將面對眾多機遇和挑戰。預期本地經濟將受惠於美國經濟的逐步復 甦及中國經濟的穩步增長,但持續的低息環境 仍會爲銀行盈利帶來壓力。

本集團強調風險控制與業務增長及發展需要取得有機平衡,因此在持續發展的過程中,將致力維持良好的公司治理及風險管理,並且按照客戶對各項服務的需求和市場的發展,提供更多切合客戶需要的產品和服務。本行會繼續提高專業團隊的服務水平,擴大產品和服務的覆蓋面,務求令客戶能得到靈活、快捷和貼身的服務。

面對客戶不同的跨境服務需求,本行將進一步 發揮本地和內地服務團隊的聯動作用,優化以 客戶爲中心的跨境服務模型,爲企業在兩地的 資金融通,以及個人的跨境理財提供更專業的 服務。

Prospect

Looking forward to 2013, the global economic would remain highly uncertain. The outlook of the Hong Kong banking sector is expected to consist of a combination of challenges and opportunities. The local economy would benefit from gradual economic recovery in the US and moderate growth in the Mainland. However, persistently low interest rates would continue to exert pressure on bank's profit.

Despite the possible headwinds ahead, the Group will strive to maintain a prudent but growth strategy in conjunction with sound corporate governance and risk management. The Group will maintain a balance between risk control and business growth and development. In terms of business development, the Group aims at providing flexible, convenient and personalised banking services. Therefore, we will continue to enhance the professionalism of our service teams as well as our products and services in response to market development and customer needs.

Market Risk Management

Market risk refers to the risk of losses arising from adverse movements in the value of foreign exchange and commodity positions, and the trading book interest rate and equity positions held by the Group due to the volatility of financial market price (debt security price/interest rate, foreign exchange rate, equity price, commodity price). The Group adopts a robust market risk appetite to achieve balance between risk and return. For details of the Group's Market Risk Management, please refer to Note 4.2 to the Financial Statements in this Annual Report.

The Group uses the VAR to measure and report general market risks to the Risk Management Committee ("RC") and senior management on a periodic basis. The Group adopts a uniformed VAR calculation model, using historical simulation approach and 2-year historical data, to calculate VAR of the Group and subsidiaries over a 1-day holding period with 99% confidence level, and to set up VAR limit of the Group and subsidiaries.

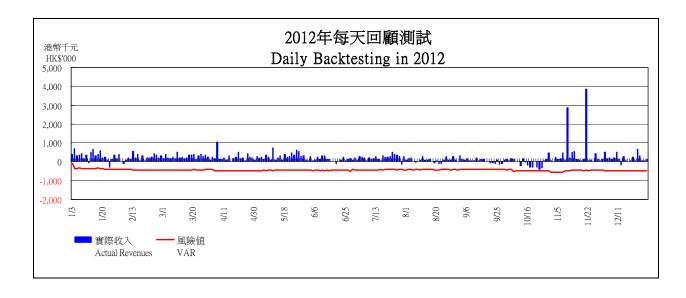

The predictive power of the VAR measure is monitored by back-testing, which compares the calculated VAR figure of market risk exposures of each business day with the actual and hypothetical revenues arising on those exposures on the next business day. Generally speaking, the number of back-testing exceptions in a rolling 12-month period will not exceed four times, given a 99% confidence level. The graph below shows the back-testing result of the VAR against actual revenues of the Group.

Operational Risk Management

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events. The risk is inherent in every aspect of business operations and confronted by the Bank in its day to day operational activities.

The Group has implemented the "Three Lines of Defence" for its operational risk management. All departments or functional units as the first line of defence are the first parties responsible for operational risk management, and carry out the duties and functions of self risk control in the process of business operation through self assessment, self checking, self correction and self development. Operation and Control Department ("OCD") together with certain specialist functional units in relation to operational risk management within the Group are the second line of defence, which is responsible for assessing and monitoring the operational risk conditions in the first line of defence, and providing them with guidance. OCD, being independent from the business units, is responsible for assisting the Management in managing the Group's operational risk, including the establishment and review of the operational risk management policy and framework, designing the operational risk management tools and reporting mechanism, and assessing and reporting the overall operational risk position to the Management and RC. Specialist functional units are required to carry out their managerial duties of the second line defence with respect to some specific aspects of operational risk and its related issues. Besides taking charge of operational risk management in their own units, these units are also required to provide other units with professional advice/training in respect of certain operational risk categories and to lead the Group-wide operational risk management. Audit Division is the third line of defence which provides independent assessment to the robustness and adequacy of the operational risk management framework and is required to conduct periodic audit of the operational risk management activities of various departments or functional units within the Group regarding their compliance and effectiveness and to put forward recommendations for remedial actions.

The Group has put in place an effective internal control process which requires the establishment of policies and control procedures for all the key activities. The Group adheres to the fundamental principle of proper segregation of duties and authorisation. The Group adopts various operational risk management tools or methodologies such as key risk indicators, self-assessment, operational risk events reporting and review to identify, assess, monitor and control the risks inherent in business activities and products, as well as purchase of insurance to mitigate unforeseeable operational risks. Business continuity plans are established to support business operations in the event of an emergency or disaster. Adequate backup facilities are maintained and periodic drills are conducted.

Reputation Risk Management

Reputation risk is the risk that negative publicity regarding the Group's business practices, whether genuine or not, will cause a potential decline in the customer base or lead to costly litigation or revenue erosion. Reputation risk is inherent in every aspect of business operation and covers a wide spectrum of issues

In order to mitigate reputation risk, the Group has formulated and duly followed its Reputation Risk Management Policy. The policy aims to prevent and manage reputation risk proactively at an early stage when an incident occurs. Since reputation risk is often caused by various types of operational and strategic issues that negatively impact the trust and perception of the Bank, all operational and key risks identified are assessed through the established Key Control Self-Assessment framework, including risk assessment tools, to evaluate the severity of their impact on the Group, including the damage to reputation.

In addition, the Group has put in place a comprehensive framework to continuously monitor reputation risk incidents in the financial industry. This continuous monitoring enables the Group to effectively manage, control and mitigate any potential adverse impact from an incident.

Legal and Compliance Risk Management

Legal risk is the risk that unenforceable contracts, lawsuits or adverse judgments may disrupt or otherwise negatively affect the operation or financial condition of the Group. Compliance risk is the risk of legal or regulatory sanctions, financial loss, or loss to reputation a bank may suffer as a result of its failure to comply with all applicable laws and regulations. Strategic Risk Management

Strategic risk generally refers to the risks that may induce some current or future negative impacts on the earnings, or capital or reputation or market position of the Group because of poor business decisions, improper implementation of decisional strategies and lack of response to the market. The Board reviews and approves the strategic risk management policy. Key strategic issues have to be fully evaluated and properly endorsed by the senior management and the Board.

The Group will regularly review its business strategies to cope with the latest market situation and developments.

資本管理

本銀行資本管理的主要目標是維持與本銀行整體風險狀況相稱的資本充足水平,同時爲股東帶來最大回報。資產負債管理委員會定期檢討本銀行資本結構,並在需要時進行調整以保持風險、回報與資本充足性的最佳平衡。

為符合香港金融管理局監管政策手冊「監管審查程序」內的要求,集團採用內部資本充足評估程序並每年作出重檢。按金管局對第二支柱的指引,內部資本充足評估程序主要用以評估未能在第一支柱下涵蓋的重大風險所需的額外資本,從而設定出集團最低普通股資本充足率、最低核心資本充足率及最低資本充足率。同時,集團亦設定了資本充足率運作區間,以支持業務發展需要及促進資本的有效運用。

巴塞爾資本協定三資本要求於 2013 年 1 月 1 日起開始運作。本銀行已就有關影響作出評估,並爲落實新資本要求做好準備。

壓力測試

本集團以壓力測試輔助各項風險的分析工作。壓力測試是一種風險管理工具,用以評估當市場或宏觀經濟因素急劇變化並產生極端不利的經營環境時銀行風險暴露的情況。本集團內各風險管理單位按香港金融管理局監管政策手冊「壓力測試」內的原則,定期進行壓力測試。資產負債管理委員會根據風險管理委員會批准的主要風險限額,對壓力測試的結果進行監控,營運及調控部定期向董事會及風險管理委員會匯報本集團的綜合測試結果。

Capital Management

The major objective of the Bank's capital management is to maximise total shareholders' return while maintaining a capital adequacy position in relation to the Bank's overall risk profile. The Assets and Liabilities Management Committee ("ALCO") periodically reviews the Bank's capital structure and adjusts the capital mix where appropriate to maintain an optimal balance among risk, return and capital adequacy.

To comply with the HKMA's requirements as stated in the Supervisory Policy Manual "Supervisory Review Process", the Group adopts the Internal Capital Adequacy Assessment Process (ICAAP) and reviews it annually. Based on the HKMA's guidelines on Pillar II, ICAAP has been initiated to assess the extra capital needed to cover the material risks not captured under Pillar I, and therefore minimum common equity CAR, minimum core CAR and the minimum CAR are determined. Meanwhile, an operating CAR Range has also been established which enables the flexibility for future business growth and efficiency of capital utilisation.

The Group has assessed the relevant impact and been well prepared for the implementation of Basel III capital standards which came into operation on 1 January 2013.

Stress Testing

The Group supplements the analysis of various types of risks with stress testing. Stress testing is a risk management tool for estimating risk exposures under stressed conditions arising from extreme but plausible market or macroeconomic movements. These tests are conducted on a regular basis by the Group's various risk management units in accordance with the principles stated in the Supervisory Policy Manual "Stress-testing" published by the HKMA. The ALCO monitors the results against the key risk limit approved by the RC. The OCD reports the combined stress test results of the Group to the Board and RC regularly.

The Remuneration and Incentive Mechanism of the Group is based on the principles of "effective motivation" and "sound remuneration management". It links remuneration, performance and risk factors closely. It serves to encourage staff to enhance their performance and at the same time strengthen their mindset of risk management so as to achieve sound remuneration management.

Remuneration and Incentive Mechanism (continued)

1. "Senior Management" and "Key Personnel"

The following groups of employees have been identified as the "Senior Management" and "Key Personnel" as defined in the HKMA's Guideline on a Sound Remuneration System:

- "Senior Management": The senior executives designated by the Board who are responsible for oversight of the firm-wide strategy or material business lines, including Chief Executive and Deputy General Manager.
- "Key Personnel": The employees whose individual business activities involve the assumption of material risk which may have significant impact on risk exposure, or whose individual responsibilities are directly and materially linked to the Group's risk management, or those who have direct influence to the Group profit, including Head of material business line, Head of Trading, as well as Head of risk control functions.

2. Determination of the Remuneration Policy

To fulfill the above-mentioned principles and to facilitate effective risk management within the framework of the Remuneration Policy of the Group, the Remuneration Policy of the Group is initiated by Human Resources Division with consultation of the risk control units including risk management, financial management and compliance in order to balance the needs for staff motivations, sound remuneration and prudent risk management. After the proposed Remuneration Policy is cleared with the Board of Management, it will be submitted to the Nomination and Remuneration Committee for review and thereafter to the Board of Directors for approval. NRC and the Board of Directors will seek opinions from other Board committees (e.g. RC, AC, etc.) where they consider necessary under the circumstances.

3. Key Features of the Remuneration and Incentive Mechanism

(1) Performance Management Mechanism

To reflect the "performance-driven" corporate culture, the Group has put in place a performance management mechanism to formalise the performance management at the levels of the Group, units and individuals. The annual targets of the Group will be cascaded down under the framework of balanced scorecard whereby the performance of the "Senior Management" and different units (including business units, risk control units and other units) would be assessed from the perspectives of financial, customer, building blocks/key tasks, human capital, risk management and compliance. For individual staff at different levels, annual targets of the Group will be tied to their job requirements through the performance management mechanism. Performance of individuals will be appraised on their achievement against targets, their contribution towards performance of their units and fulfilment of risk management duties and compliance. Not only is target accomplishment taken into account, but the risk exposure involved during the course of work could also be evaluated and managed, ensuring security and normal operation of the Group. Core values are also assessed to facilitate the attainment of them.

薪酬及激勵機制 (續)

3. 薪酬及激勵機制的主要特色(續)

(2) 薪酬的風險調節

爲落實績效及薪酬與風險掛鈎的原則,本集團根據《集團浮薪資源總額的風險調節方法》,把本銀行涉及的主要風險調節因素結合到本集團的績效考核機制中,而本集團的浮薪總額則按經董事會審定的風險調節後的績效結果計算,並由董事會酌情決定,以確保本集團浮薪總額是在充分考慮本集團的風險概況及變化情況後決定,從而使薪酬制度貫徹有效的風險管理。

(3) 以績效爲本、與風險掛鈎的薪酬管理

員工的薪酬由「固定薪酬」和「浮動薪酬」兩部分組成。固薪和浮薪的比重在達致適度平衡的前提下,因應員工職級、角色、責任及職能而釐定。一般而言,員工職級愈高及/或責任愈大,浮薪佔總薪酬的比例愈大,以體現本集團鼓勵員工履行審慎的風險管理及落實長期財務的穩定性的理念。

每年本集團將結合薪酬策略、市場薪酬 趨勢、員工薪金水平等因素,並根據本 集團的支付能力及本集團、單位和員工 的績效表現,定期重檢員工的固薪。如 前所述,量度績效表現的因素,包括定 量和定性的,也包括財務及非財務指 標。

按本集團浮薪資源總額管理機制的相關規定,董事會主要根據本集團的財務績效表現、與本集團長期發展相關的非財務戰略性指標的完成情況,結合風險因素等作充分考慮後,審批本集團浮薪資源總額。除按機制規定的有關公式計算外,董事會可根據實際情況對本集團的浮薪資源總額作酌情調整。在本集團業績表現較遜色時(如未達至集團業績的門檻條件),原則上不發當年浮薪,惟董事會仍有權視實際情況作酌情處理。

Corporate Governance (continued)

Remuneration and Incentive Mechanism (continued)

3. The Key Features of the Remuneration and Incentive Mechanism (continued)

(2) Risk Adjustment of Remuneration

To put the principle of aligning performance and remuneration with risk into practice, based on "The Risk Adjustment Method for Group Bonus Funding Mechanics", the key risk modifiers of the Bank have been incorporated into the performance management mechanism of the Group. The size of the Variable Remuneration Pool of the Group is calculated according to the risk adjusted performance results approved by the Board and is subject to the Board's discretion. This method ensures the Group to fix the Group's Variable Remuneration Pool after considering risk exposures and changes and to maintain effective risk management through the remuneration mechanism.

(3) Performance-based and Risk-adusted Remuneration Management

The remuneration of staff is composed of "fixed remuneration" and "variable remuneration". The proportion of one to the other for individual staff members depends on job grades, roles, responsibilities and functions of the staff with the prerequisite that balance has to be struck between the fixed and variable portion. Generally speaking, the higher the job grades and/or the greater the responsibilities, the higher will be the proportion of variable remuneration so as to encourage the staff to follow the philosophy of prudent risk management and sound long-term financial stability.

Every year, the Group will conduct periodic review on the fixed remuneration of the staff with reference to various factors like remuneration strategy, market pay trend and staff salary level, and will determine the remuneration based on the affordability of the Group as well as the performance of the Group, units and individuals. As mentioned above, performance assessment criteria include quantitative and qualitative factors, as well as financial and non-financial indicators.

According to the Group Bonus Funding Mechanics, the size of the Variable Remuneration Pool of the Group is determined by the Board on the basis of the financial performance of the Group and the achievement of non-financial strategic business targets under the long-term development of the Group. Thorough consideration is also made to the risk factors in the determination process. The size of the Pool is reached based on pre-defined formulaic calculations but the Board can make discretionary adjustment to it if deemed appropriate under prevailing circumstances. When the Group's performance is relatively weak (e.g. failed to meet the threshold performance level), no variable remuneration will be paid out that year in principle, however, the Board reserves the rights to exercise its discretion.

薪酬及激勵機制 (續)

3. 薪酬及激勵機制的主要特色(續)

(3) 以續效爲本、與風險掛鈎的薪酬管理 (續)

在單位及員工層面方面,浮薪分配與單位及個人績效緊密掛鈎,有關績效的量度須包含風險調節因素。風險控制職能單位人員的績效及薪酬評定基於其核心職能目標的完成情況,獨立於所監控的業務範圍;對於前線單位的風險控制人員,則透過矩陣式的匯報及考核機制確保其績效薪酬的合適性。在本集團可接受的風險水平以內,單位的績效愈好及員工的工作表現愈優秀,員工獲得的浮薪愈高。

(4) 浮薪發放與風險期掛鈎,體現本集團 的長遠價值創造

爲實現薪酬與風險期掛鈎的原則,使相關風險及其影響可在實際發放薪酬之前有足夠時間予以充分確定,員工的浮薪在達到遞延發放的門檻條件下,按規定,以現金形式作遞延發放。就遞延發放的安排,本集團採取遞進的模式,員工工作涉及風險期愈長、職等愈高或浮薪水平愈高的崗位、遞延浮薪的比例愈大。遞延的年期爲3年。

遞延浮薪的歸屬與本集團長遠價值創造相連結。遞延浮薪的歸屬條件與本集團未來 3 年每年的績效掛鈎,每年在本集團績效(含財務及非財務)達到門檻條件的情況下,員工按遞延浮薪的歸屬比例歸屬當年的遞延浮薪。若本集團或單位的績效表現估算需作重大修正、員工被證實犯欺詐、瀆職或違反內控政策的情況下,本集團便會索回員工並未歸屬的遞延浮薪,不予發放。

4. 外部薪酬顧問

爲確保薪酬激勵機制的合適性,保持薪酬的市場競爭力,本集團曾就高級管理人員的薪酬管理事宜以及市場薪酬數據諮詢Towers Watson Pennsylvania Inc. 及McLagan的獨立意見。

Corporate Governance (continued)

Remuneration and Incentive Mechanism (continued)

3. The Key Features of the Remuneration and Incentive Mechanism (continued)

(3) Performance-based and Risk-adjusted Remuneration Management (continued)

As far as individual units and individual staff are concerned, allocation of the variable remuneration is closely linked to the performance of the units, and that of each individual staff as well as the unit he/she is attaching to, and the assessment of which should include risk modifiers. The performance and remuneration arrangement of risk control personnel are determined by the achievement of their core job responsibilities, independent from the business they oversee; for front-line risk controllers, a matrix reporting and performance management system is applied to ensure the suitability of performance-based remuneration. Within the acceptable risk level of the Group, the better the performance of the unit and the individual staff, the higher will be the variable remuneration for the individual staff.

(4) Linking the payout of the variable remuneration with the time horizon of the risk to reflect the long-term value creation of the Group

To work out the principle of aligning remuneration with the time horizon of risk and to ensure that sufficient time is allowed to ascertain the associated risk and its impact before the actual payout, payout of the variable remuneration of staff is required to be deferred in cash if such amount reaches certain prescribed threshold. The Group adopts a progressive approach towards deferral. The longer the time horizon of risk in the activities conducted by the staff, the higher the job grade or the higher amount of the variable remuneration, the higher will be the proportion of deferral. Deferral period lasts for 3 years.

The vesting of the deferred variable remuneration is linked with the long term value creation of the Group. The vesting conditions are linked to the yearly performance (financial and non-financial) of the Group in the next 3 years to the effect that the variable remuneration could only be vested to such extent as set for the relevant year in that 3-year period subject to the condition that the Group's performance has met the threshold requirement in the corresponding year. In case of material revision of the original estimates of the performance of the Group or individual units, or if a staff is found to commit fraud, or found to be of malfeasance or in violation of internal control policies, the unvested portion of the deferred variable remuneration of the relevant staff will be clawed back.

4. External Remuneration Consultant

To ensure the suitability and competitiveness of the remuneration and incentive mechanism, the Group appointed Towers Watson Pennsylvania Inc. and McLagan for independent consultation in areas of pay management mechanism of "Senior Management" and market remuneration data.

- ·香港會計準則第19號(2011)「僱員福利」。該修訂後的準則主要修改了對設定收益義務及計劃資產變動的會計處理方法和相關的列示與披露。該修訂對本集團的財務報表沒有重大的影響。

The amendments also reaffirm existing requirements that items in OCI and profit or loss should be presented as either a single statement or two consecutive statements. The adoption of this revised standard will affect the presentation of the Group's statement of comprehensive income.

- (b) 已頒布但尚未強制性生效及沒有被本集團於 2012 年提前採納之準則、修訂及詮釋 (續)
 - ·香港會計準則第32號(經修訂),「金融工具:列示-金融資產及金融負債之抵銷」。該修訂針對現行應用於處理抵銷的不一致準則,並明確"目前已具有法律強制性執行抵銷權利"的含義;以及一些應用於總額結算系統(例如中央結算系統)時被視爲等同於淨額結算的抵銷準則。本集團正在評估有關修訂的財務影響。
 - ·香港財務報告準則第7號(經修訂) 「金融工具:披露-金融資產及金融 負債之抵銷」。該修訂新增了披露的 要求,需包括可讓財務報表使用者能 夠評估淨額結算安排(包括對已確認 金融資產及已確認金融負債的抵銷 權)對企業財務狀況的影響或潛在影 響的資訊。採納此經修訂的準則將會 影響本集團對財務報表的披露方式。
 - ・香港財務報告準則第7號(經修訂),「金融工具:披露-香港財務報告準則第9號的過渡安排」。該修訂免除當採納香港財務報告準則第9號之後需重列比較數字的要求,而該豁免原來只適用於選擇在2012年前採納香港財務報告準則第9號的企業。取而代之,該修訂提出額外的過渡性披露要求,以幫助使用者更好地了解初始應用此準則的影響。
 - ·香港財務報告準則第9號「金融工具」。香港財務報告準則第9號的第一部分已於2009年11月頒佈,並將取代香港會計準則第39號內金融資產的分類及計量相關的部分。而有關金融負債及終止確認的相關部分,亦已於2010年11月發佈。其主要的特點如下:

(i) 分類及計量

金融資產被要求分類爲以下其中之一種計量類別:(1)以公平值作後續計量或(2)以攤餘成本作後續計量。金融資產的分類應在過渡時確定,之後則在初始確認時確定。該分類取決於企業管理金融工具的業務模型,以及該工具的合約現金流特徵。

2. Summary of significant accounting policies (continued)

- 2.1 Basis of preparation (continued)
- (b) Standards, amendments and interpretations issued that are not yet mandatorily effective and have not been early adopted by the Group in 2012 (continued)
 - HKAS 32 (Amendment), 'Financial Instruments: Presentation Offsetting Financial Assets and Financial Liabilities'. The amendment addresses inconsistencies in current practice when applying the offsetting criteria and clarifies the meaning of 'currently has a legally enforceable right of set-off'; and the application of offsetting criteria to some gross settlement systems (such as central clearing house systems) that may be considered equivalent to net settlement. The Group is considering the financial impact of the amendment.
 - HKFRS 7 (Amendment), 'Financial Instruments: Disclosures Offsetting
 Financial Assets and Financial Liabilities'. The amendments require new
 disclosures to include information that will enable users of an entity's
 financial statements to evaluate the effect or potential effect of netting
 arrangements, including rights of set-off associated with the entity's
 recognised financial assets and recognised financial liabilities, on the
 entity's financial position. The adoption of this amended standard will
 affect the disclosure of the Group's financial statements.
 - HKFRS 7 (Amendment), 'Financial Instruments: Disclosures Transition
 to HKFRS 9'. The amendments provide relief from the requirement to
 restate comparative financial statements which was originally available
 only to entities that chose to apply HKFRS 9 prior to 2012. Instead,
 additional transition disclosures will be required to help users to better
 understand the effect of initial application of the standard.
 - HKFRS 9, 'Financial Instruments'. The first part of HKFRS 9 was issued in November 2009 and will replace those parts of HKAS 39 relating to the classification and measurement of financial assets. In November 2010, a further pronouncement was published to address financial liabilities and derecognition. Key features are as follows:

(i) Classification and Measurement

Financial assets are required to be classified into one of the following measurement categories: (1) those to be measured subsequently at fair value or (2) those to be measured subsequently at amortised cost. Classification is to be made on transition, and subsequently on initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument

(b) 已頒布但尚未強制性生效及沒有被本集團於 2012 年提前採納之準則、修訂及詮釋 (續)

(i) 分類及計量 (續)

如以攤餘成本對一項金融工具進 行後續計量,其必須是一項債務 工具,及企業的業務模型是以持 有該資產以收取合約現金流爲目 的,以及該資產的合約現金流爲 代表沒有槓桿的本金及利息支 付。所有其他債務工具需以公平 值變化計入損益計量。

所有權益性工具需以公平値作後續計量。持作交易用途之權益性工具將以公平值變化計入損益計量。對於所有其他的權益性投資,可於初始確認時作出不可撤回的選擇,將未實現及已實現的公平值收益或虧損確認於其他全面收益,而非收益表內。一經選擇確認於其他全面收益,公平值收益或虧損將不可轉回收益表內。若作爲投資的回報,股息需列示於收益表內。

(ii) 金融負債及終止確認

除下述兩項主要變化外,金融負債的分類及計量基本上保留了香港會計準則第39號的要求,沒有太多修訂。至於終止確認的原則,則與現時香港會計準則第39號一致。

修改了準則內有關金融負債的公 平值選擇權的要求,以應對自債 的其信用風險。準則要求金融負債 因其信用風險的改變而導致的 平值變動,需列示於其他全面的 與色括於收益表內。若此對 更包括於收益表內。計錯配 整項公平值變動需列示於收益 整項公平值變動需列示於收益 內。有否存在錯配情況需在的被 確認個別負債時確定,且不能被 重新評估。列示於其他全面收益 重新評估。柯可於權益內 類轉。

該準則取消了載於香港會計準則 第39號有關與非上市權益工具掛 鉤及交收的衍生工具負債可豁免 以公平値計量的要求。

2. Summary of significant accounting policies (continued)

- 2.1 Basis of preparation (continued)
- (b) Standards, amendments and interpretations issued that are not yet mandatorily effective and have not been early adopted by the Group in 2012 (continued)
 - (i) Classification and Measurement (continued)

A financial instrument is subsequently measured at amortised cost only if it is a debt instrument, and the objective of the entity's business model is to hold the asset to collect the contractual cash flows, and the asset's contractual cash flows represent only unleveraged payments of principal and interest. All other debt instruments are to be measured at fair value through profit or loss.

All equity instruments are to be measured subsequently at fair value. Equity instrument that are held for trading will be measured at fair value through profit or loss. For all other equity investments, an irrevocable election can be made at initial recognition to recognise unrealised and realised fair value gains and losses through other comprehensive income rather than income statement. Once elected to be recognised through other comprehensive income, there will be no reclassification of fair value gains and losses to income statement. Dividends are to be presented in income statement as long as they represent a return on investment.

(ii) Financial Liabilities and Derecognition

Except for the two substantial changes described below, the classification and measurement requirements of financial liabilities have been basically carried forward with minimal amendments from HKAS 39. For the derecognition principles, they are consistent with that of HKAS 39.

The requirements related to the fair value option for financial liabilities were changed to address own credit risk. It requires the amount of change in fair value attributable to changes in the credit risk of the financial liabilities be presented in other comprehensive income. The remaining amount of the total gain or loss is included in income statement. If this requirement creates or enlarges an accounting mismatch in profit or loss, then the whole fair value change is presented in income statement. The determination of whether there will be a mismatch will need to be made at initial recognition of individual liabilities and will not be re-assessed. Amounts presented in other comprehensive income are not subsequently reclassified to income statement but may be transferred within equity.

The standard eliminates the exception from fair value measurement contained in HKAS 39 for derivative liabilities that are linked to and must be settled by delivery of an unquoted equity instrument.

(b) 已頒布但尚未強制性生效及沒有被 本集團於 2012 年提前採納之準則、 修訂及詮釋 (續)

> 香港財務報告準則第9號的強制生效 日期爲2015年1月1日,但仍容許提 前採納。新的過渡性披露要求將代替 重列比較數字。本集團正在評估應用 該準則的財務影響及其應用時間。

- · 香港財務報告準則第10號「綜合財務 報表」。於考慮應否將企業納入母公 司之綜合財務報表時,香港財務報告 準則第10號於現有原則之上建立了 以控制作爲決定性因素之概念,並在 難以評估控制權時提供額外指引。該 準則亦取代了香港會計準則第27號 (經修訂)「綜合及獨立財務報表」 中所有對控制和合併的指引規定和 HK(SIC)-Int 12「合併-特殊目的企 業」。香港會計準則第27號(經修訂) 餘下部分將更名爲香港會計準則第 27號(2011)「獨立財務報表」,此乃 專爲處理獨立財務報表而設,其內容 並沒有對獨立財務報表的現有指引 作出改變。
- ·香港財務報告準則第12號「其他企業投資權益的披露」。香港財務報告準則第12號規定了企業按香港財務報告準則第10號及香港財務報告準則第11號兩個新準則,以及按經修訂後的香港會計準則第28號(2011)編製報告時必需要披露的信息。香港會計準則第27號(經修訂)對獨立財務報表的現行指引和信息披露要求維持不變。香港財務報告準則第12號要求企業需披露能協助財務報表使用者評估企業投資於附屬公司、聯營公司、合資安排及非綜合的結構企業之性質,風險和財務影響相關的信息。

2. Summary of significant accounting policies (continued)

- 2.1 Basis of preparation (continued)
- (b) Standards, amendments and interpretations issued that are not yet mandatorily effective and have not been early adopted by the Group in 2012 (continued)

The mandatory effective date of HKFRS 9 is 1 January 2015 with earlier adoption still permitted. New transitional disclosures are required instead of comparative restatement. The Group is considering the financial impact of the standard and the timing of its application.

- HKFRS 10, 'Consolidated Financial Statements'. HKFRS 10 builds on existing principles by identifying the concept of control as the determining factor when considering whether an entity should be included within the consolidated financial statements of the parent company. The standard provides additional guidance to assist in the determination of control where this is difficult to assess. It also replaces all of the guidance on control and consolidation stipulated in HKAS 27 (Revised), 'Consolidated and Separate Financial Statements' and HK(SIC)- Int 12, 'Consolidation Special Purpose Entities'. The remainder of HKAS 27 (Revised) is renamed HKAS 27 (2011), 'Separate Financial Statements' as a standard dealing solely with separate financial statements without changing the existing guidance for separate financial statements.
- HKFRS 12, 'Disclosure of Interests in Other Entities'. The standard sets out the required disclosures for entities reporting under the two new standards, HKFRS 10 and HKFRS 11, and the revised standard HKAS 28 (2011). The existing guidance and disclosure requirements for separate financial statements stipulated in HKAS 27 (Revised) are unchanged. HKFRS 12, requires entities to disclose information that helps financial statements readers to evaluate the nature, risks and financial effects associated with the entity's interests in subsidiaries, associates, joint arrangements and unconsolidated structured entities.

2.1 編製基準 (續)

(b) 已頒布但尚未強制性生效及沒有被本集團於 2012 年提前採納之準則、修訂及詮釋 (續)

香港財務報告準則第10號、香港財務報告準則第12號、香港會計準則第27號(2011)及香港會計準則第28號(2011)為一組共5項於2011年6月頒佈的新準則。並將取代香港會計準則第28號、香港會計準則第31號、HK(SIC)-Int 12及HK(SIC)-Int 13。此等準則獲准可提前實施,但必須同時開始一起應用。上述準則對本集團的財務報表沒有重大影響。

- 香港財務報告準則第10、11及12號 (經修訂)的過渡安排。該修訂放寬 當採納香港財務報告準則第10、11 及12號後需追溯比較數字的要求,要 求只須重列採納相關準則前一年的 比較數字。該修訂對本集團的財務披 露沒有重大影響。
- ·香港財務報告準則第13號「公平值計量」。此項於2011年6月頒佈的新準則為所有與公平值計量相關的香港財務報告準則提供了一個經修訂的公平值定義、單一的公平值計量方法和信息披露要求,並取代了現時載於個別香港財務報告準則內有關公平值計量的指引。有關的要求並沒有擴闊公平值會計的應用範圍,只是對現已於香港財務報告準則內被要求或被允許應用的公平值會計提供了應用指引。本集團正在評估採納上述準則對本集團財務報表的影響。

2. Summary of significant accounting policies (continued)

- 2.1 Basis of preparation (continued)
- (b) Standards, amendments and interpretations issued that are not yet mandatorily effective and have not been early adopted by the Group in 2012 (continued)

The above HKFRS 10, HKFRS 11, HKFRS 12, HKAS 27 (2011) and HKAS 28 (2011) issued in June 2011 are a group of five new standards that address the scope of reporting entity and will supersede HKAS 27 (Revised), HKAS 28, HKAS 31, HK(SIC)-Int 12 and HK(SIC)-Int 13. Earlier application of these standards are permitted but only when they are applied at the same time. The adoption of these standards does not have a material impact on the Group's financial statements.

- HKFRS 10, 11 and 12 (Amendment), on transition guidance. The amendments provide additional transition relief to HKFRSs 10, 11 and 12, limiting the requirement to provide adjusted comparative information to only the preceding comparative period. The adoption of this amendment will not materially affect the disclosure of the Group's financial statements.
- HKFRS 13, 'Fair Value Measurement'. The new standard which was issued in June 2011 replaces the fair value measurement guidance contained in individual HKFRSs by providing a revised definition of fair value and a single source of fair value measurement and disclosure requirements for use across HKFRSs. The requirements do not extend the use of fair value accounting, but provide guidance on how it should be applied when its use is already required or permitted by other standards within HKFRSs. The Group will apply HKFRS 13 prospectively from 1 January 2013.

(c) 完善香港財務報告準則

「完善香港財務報告準則」包含多項被香港會計師公會認為非緊急但有需要的修訂。當中包括引致在列示、確認或計量方面出現會計變更的修訂,以及多項與個別的香港財務報告準則相關之術語或編輯上的修訂。修訂於2013年1月1日起開始的會計年度生效,對集團的會計政策沒有重大影響。

(c) Improvements to HKFRS

'Improvements to HKFRS' contains numerous amendments to HKFRS which the HKICPA considers not urgent but necessary. It comprises amendments that result in accounting changes for presentation, recognition or measurement purpose as well as terminology or editorial amendments related to a variety of individual HKFRS. The amendments are effective for annual periods beginning on or after 1 January 2013. No material changes to accounting policies are expected as a result of these amendments.

2.2 綜合財務報表

綜合財務報表包含本銀行及所有其附屬公司截至 12 月 31 日的財務報表。

(1) 附屬公司

附屬公司是指由本集團有權支配 其財務和經營政策的所有企業(包 括特殊目的企業),通常體現爲對 該企業董事會組成的控制,對該企 業擁有半數以上的表決權或持有 其過半數的已發行股權,或本集團 以任何其他方式控制該企業的財 務及經營政策。在判斷是否對某個 企業存在控制權時,本集團亦會考 慮目前可行使或可轉換的潛在表 決權的存在及其影響。附屬公司於 控制權轉入本集團之日起完全納 入合併,並於本集團的控制權終止 當日不再納入合併。

(i) 非受共同控制的業務合併

收購非受共同控制之業務時,應 以收購法進行會計處理。業務合 併的代價乃集團因換取被收購 方的控制權,而在收購當日所轉 讓的資產的公平値、所產生的負 債(包括或然代價安排)、以及 所發行的權益。與收購相關的成 本會於發生時於收益表內確認。

轉讓的代價、持有被收購方的非控制權益金額、以及本集團之前已持有被收購方之權益的公平值(如有)之總和,其高於收購日的被收購可識別資產及需承擔負債的淨值,被計量爲商譽。如經評估後,被收購方的可識別淨資產的公平值高於轉讓的代價、持有被收購方的非控制權益金額、以及本集團之前已持有被收購方之權益的公平值(如有)之總和,多出的部分將即時於收益表內被確認爲優惠收購收益。之後,需對商譽進行減值測試。

2.2 Consolidation

The consolidated financial statements include the financial statements of the Bank and all of its subsidiaries made up to 31 December.

(1) Subsidiaries

Subsidiaries are all entities (including special purpose entities) over which the Group controls the composition of the Board of Directors, controls more than half of the voting power, holds more than half of the issued capital or by any other means that entitle the Group to govern the financial and operating policies of the entities. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

(i) Business combinations not under common control

Acquisitions of businesses not under common control are accounted for using the acquisition method. The consideration transferred in a business combination is the fair values at the acquisition date of the assets transferred, the liabilities incurred (including contingent consideration arrangement) and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are expensed the in income statement as incurred.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the Group's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If after assessment, the fair value of the acquiree's identifiable net assets exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the Group's previously held interest in the acquiree (if any), the excess is recognised immediately in income statement as a bargain purchase gain. Subsequently, goodwill is subject to impairment testing.

以逐項收購爲基準,本集團可選 擇以公平值或非控制性權益按 比例攤佔之被收購方之可識別 淨資產之公平值,來確認被收購 方之非控制性權益。 (i) Business combinations not under common control (continued)

Where the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at fair value at the acquisition date and considered as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with the corresponding adjustments being made against goodwill or gain on bargain purchase. Measurement period adjustments are adjustments that arise from additional information obtained during the measurement period about facts and circumstances that existed as of the acquisition date. Measurement period does not exceed one year from the acquisition date.

On an acquisition-by-acquisition basis, the Group recognises any non-controlling interests in the acquiree either at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets.

For combination with a company under common control, the merger accounting method will be applied. The principle of merger accounting is a way to combine companies under common control as though the business of the acquiree had always been carried out by the acquirer. The Group's consolidated financial statements represent the consolidated results, consolidated cash flows and consolidated financial position of the Group as if any such combination had occurred from the date when the Bank and the acquiree first came under common control (i.e. no fair value adjustment on the date of combination is required). The difference between the consideration and carrying amount at the time of combination is recognised in other comprehensive income. The effects of all transactions between the Group and the acquiree, whether occurring before or after the combination, are eliminated in preparing the consolidated financial statements of the Group. Comparative amounts are presented as if the acquiree had been combined at the previous end of the reporting period. The transaction costs for the combination will be expensed in the income statement.

2.4 外幣換算

本集團各企業的財務報表所載項目 均按各企業於主要經濟環境營運的 貨幣計量(「功能貨幣」)。本綜合 財務報表以港幣列示,即本公司之功 能及呈列貨幣。

外幣交易均按交易或重新計量項目 之估值當日的即期匯率換算為功能 貨幣。外幣交易以交易日之匯率結算 所引致的匯兌損益,以及以外幣為本 位的貨幣性資產及負債按會計結算 日的匯率換算的匯兌損益,均直接於 收益表確認,惟於其他全面收益內遞 延作爲合資格現金流量的對沖或合 資格淨投資的對沖除外。

以公平值變化計入損益的貨幣性證券的兌換差額會列作公平值收益或虧損的一部分。對於被分類爲可供出售,以外幣爲本位的貨幣性證券,其公平值變動可分爲源自證券攤餘成本變動的兌換差額和證券賬面值的其他兌換變動兩部分。源自證券攤餘成本變動的兌換差額會於收益表內確認,而證券賬面值的其他兌換變動則被確認於其他全面收益。

對於非貨幣性項目(例如以公平值變化計入損益的股權投資),其兌換差額會列作公平值收益或虧損的一部分。而非貨幣性金融資產(例如可供出售股權投資)的兌換差額會包含在其他全面收益內。

所有本集團內非以港幣爲功能貨幣 的企業,其業績及財務狀況按以下方 式換算爲港幣:

- 資產及負債按會計結算日之收 市匯率換算;
- 收入及支出按平均匯率換算;及
- 所有產生之換算差額通過其他全 面收益於權益項目下之貨幣換算 儲備內確認。

於合併財務報表時,換算對外國企業 之淨投資、借款及其他被界定爲對沖 此投資的貨幣工具所產生之換算差 額需列入其他全面收益。當出售該外 國企業投資時,此外幣兌換差額需列 作爲出售盈虧的一部分,並確認於收 益表內。

2.4 Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in Hong Kong dollars, which is the Bank's functional and presentation currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or exchange rates at the end of the reporting period for items that are re-measured. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions using the exchange rates prevailing at the dates of the transactions and monetary assets and liabilities denominated in foreign currencies translated at the exchange rate at the end of the reporting period are recognised directly in the income statement, except when deferred in other comprehensive income as qualifying net investment hedges.

Translation differences on monetary securities held at fair value through profit or loss are reported as part of the fair value gain or loss. Changes in the fair value of monetary securities denominated in foreign currency classified as available-for-sale are analysed between translation differences resulting from changes in the amortised cost of the securities and other changes in the carrying amount of the securities. Translation differences related to changes in the amortised cost are recognised in the income statement, and other changes in the carrying amount are recognised in other comprehensive income.

Translation differences on non-monetary items, such as equities held at fair value through profit or loss, are reported as part of the fair value gain or loss. Translation differences on non-monetary financial assets such as equities classified as available-for-sale are included in other comprehensive income.

The results and financial position of all the Group entities that have a functional currency different from Hong Kong dollars are translated into Hong Kong dollars as follows:

- assets and liabilities are translated at the closing rate at the end of the reporting period;
- income and expenses are translated at average exchange rates; and
- all resulting exchange differences are recognised in the currency translation reserve in equity through other comprehensive income.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities, and of borrowings and other currency instruments designated as hedges of such investments are taken to other comprehensive income. When a foreign entity is sold, such exchange differences are recognised in the income statement, as part of the gain or loss on sale.

2.5 衍生金融工具及對沖會計

衍生金融工具以衍生交易合同簽訂 當日的公平值進行初始確認,並以公 平值進行後續計量。公平值從活躍市 場上的公開市場報價中取得,包括最 近的市場交易,或通過使用估值方 法,包括貼現現金流量分析模型、期 權定價模型(如適用)。當公平值爲 正值時,衍生金融工具將被列爲資 產;當公平值爲負值時,則被列爲負 債。

初始確認衍生金融工具公平値的最 佳證據,就是其交易價格(如付出或 收到代價的公平值)。

若干衍生金融工具會嵌藏在其他的 金融工具中,當其經濟特徵和風險與 主合同沒有緊密關聯,而主合同並非 以公平值變化計入損益時,這些嵌藏 式衍生金融工具需要單獨以公平值 計量,並且其公平值變動計入收益 表。

除非衍生金融工具已被界定為用作 對沖,並且是屬於有效之對沖工具, 則需按對沖會計之要求計量,否則, 將被分類為持作交易用途,其公平值 變動即時於收益表內確認。

2.5 Derivative financial instruments and hedge accounting

Derivatives are initially recognised at fair value on the date the derivative contract is entered into and are subsequently re-measured at fair value. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and through the use of valuation techniques, including discounted cash flow models and options pricing models, as appropriate. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

The best evidence of the fair value of a derivative at initial recognition is the transaction price (i.e., the fair value of the consideration given or received).

Certain derivatives embedded in other financial instruments are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not carried at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in the income statement.

Derivatives are categorised as held for trading and changes in their fair value are recognised immediately in the income statement unless they are designated as hedges and are effective hedging instruments, then they are subject to measurement under the hedge accounting requirements.

2.5 衍生金融工具及對沖會計 (續)

本集團於交易發生時會記錄對沖工 具與相關被對沖項目之關係、風險管 理目的和進行各類對沖交易時所採 取之策略。本集團並於對沖活動發生 時及期間,評估有關衍生金融工具能 否高度有效地抵銷相關被對沖項目 之公平值或現金流變動,並作出記 錄。此等乃符合採用對沖會計方法處 理之先決條件。

本集團界定了若干外幣客戶存款作 爲對海外運作淨投資之對沖(淨投資 對沖)。

淨投資對沖

對於已被界定爲符合採用淨投資對 沖,並且有效的外幣客戶存款,其公 平值變動的有效部分將會於其他全 面收益內確認及於權益內累計;無 效部分的盈虧即時於收益表內確 認。之前於其他全面收益中累計的收 益或虧損金額會列作收益或虧損的 一部份。並於出售海外運作時被重新 分類至收益表內。

2.6 金融工具之抵銷

若存在法律上可行使的權利,可對已確認入賬之項目進行抵銷,且有意以 淨額方式結算,或將資產變現並同時 清價債務,則金融資產及負債可予抵 銷,並把淨額於資產負債表內列賬。

2.5 Derivative financial instruments and hedge accounting (continued)

The Group documents at inception the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at the hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items. These criteria should be met before a hedge can be qualified to be accounted for under hedge accounting.

The Group designated certain foreign currency deposits from customers for hedging of net investments in foreign operations (net investment hedge).

Net investment hedge

The effective portion of change in fair value of foreign currency deposits from customers that are designated and qualified as net investment hedges are recognised in other comprehensive income and accumulated in equity; a gain or loss on the ineffective portion is recognised immediately in the income statement. Accumulated gains and losses previously recognised in other comprehensive income are reclassified to income statement upon disposal of the foreign operation as part of the gain or loss on disposal.

2.6 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

2.7 利息收入及支出、服務費及佣金 收入及支出

所有金融資產和金融負債,其利息收入和支出按實際利息法在收益表中確認。

實際利息法是一種計算金融資產或 金融負債的攤餘成本以及在相關期 間分攤利息收入或利息支出的方 法。實際利率是在金融工具預計到期 日或較短期間(如適用)內,將其未 來收到或付出的現金流貼現爲金融 資產或金融負債賬面淨額所使用的 利率。在計算實際利率時,本集團在 估計未來現金流時,會考慮金融工具 的所有合同條款(如提前還款權或爲 住宅按揭貸款客戶提供的優惠),但 不會考慮未來的信用損失。計算範圍 包括訂約各方所支付或所收取的費 用、溢價或折讓和點子,以及貸款貸 出時產生而屬於整體有效利息一部 分之相關費用及成本。

當一項金融資產或一組類似的金融 資產確認減值損失後,會按照計量減 值損失時對未來現金流進行貼現時 使用的利率,按扩減後之價值確認利 息收入。而日後釋出之貼現準備亦將 確認爲利息收入。

不屬於整體有效利息一部分的服務費及佣金收入及支出,例如行政費、資產管理費和託管服務費,通常在提供相關服務時,以應計基準按比例地於服務期間內確認。當銀團貸款安排已完成且本集團未保留任何貸款或按其他銀團成員相同的實際利率保留部分貸款時,銀團貸款服務費確認為收入。

2.7 Interest income and expense and fee and commission income and expense

Interest income and expense are recognised in the income statement for all financial assets and financial liabilities using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates future cash flows considering all contractual terms of the financial instrument (e.g. prepayment options or incentives relating to residential mortgage loans) but does not consider future credit losses. The calculation includes fees, premiums or discounts and basis points paid or received between parties to the contract, and directly attributable origination fees and costs which represent an integral part of the effective yield.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised on the written down value using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. Subsequent unwinding of the discount allowance is recognised as interest income.

Fee and commission income and expenses that are not an integral part of the effective yield are recognised on an accrual basis ratably over the period when the related service is provided, such as administrative fee, asset management fee and custody services fee. Loan syndication fees are recognised as revenue when the related syndication arrangement has been completed and the Group has retained no part of the loan package for itself or has retained a part at the same effective interest rate as that of other participants.

2.8 金融資產

本集團將金融資產分爲四類:以公平值 變化計入損益的金融資產、貸款及應收 款、持有至到期日證券和可供出售金融 資產。管理層在初始確認時即對金融資 產進行分類。金融資產是按持有目的作 分類,並以公平値作初始確認。除以公 平值變化計入損益的金融資產外,其他 金融資產之交易成本均已包含於攤餘成

(1) 以公平值變化計入損益的金融資產

這類金融資產包括兩個細項:持作 交易用途的金融資產,以及購入時 即界定爲以公平值變化計入損益的 金融資產。

如果取得該金融資產主要是以短期 沽售爲目的,或屬於組合一部分並共 同管理的可識別金融工具,若有證據 表明其短期獲利行爲,則被分類爲持 作交易用途。除被界定爲有效對沖工 具外,所有衍生金融工具均被分類爲 持作交易用途類別。

除持作交易用途的金融資產外,如能 滿足以下其之一項條件,金融資產會 被管理層界定爲以公平值變化計入 損益的金融資產:

- 可以消除或明顯減少因按不同基 準計量金融資產之價值,或確認 其盈利或虧損,而出現不一致之 計量或確認情況(一般被稱爲「會 計錯配」);或
- 應用於一組金融資產、金融負 債、或兩者兼有的組合,其管理 是依據事先書面確立的風險管理 或投資策略來運作, 其表現是按 公平值爲基礎來衡量,並向主要 管理層作出內部報告;或
- 與包含一個或多個嵌藏式衍生金 融工具的金融資產相關,且這些 嵌藏式衍生金融工具對該等金融 資產的現金流產生重大影響

這些資產以公平值進行初始確認,交 易費用直接計入收益表,並以公平值 進行後續計量。

The Group classifies its financial assets into the following categories: financial assets at fair value through profit or loss; loans and receivables; held-to-maturity securities and available-for-sale financial assets. The Management determines the classification of investments at initial recognition. The classification depends on the purpose for which the financial assets were held. All financial assets are recognised initially at fair value. Except for financial assets carried at fair value through profit or loss, all transaction costs of financial assets are included in their amortised costs.

2.8 Financial assets

(1) Financial assets at fair value through profit or loss

This category has two sub-categories: financial assets held for trading, and those designated at fair value through profit or loss at inception.

A financial asset which has been acquired or incurred principally for the purpose of selling in the short term or is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking is classified as held-for-trading. Derivatives are also classified as held for trading unless they are designated as effective hedges.

A financial asset, other than one held for trading, will be designated as a financial asset at fair value through profit or loss, if it meets one of the criteria set out below, and is so designated by the Management:

- · eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as 'an accounting mismatch') that would otherwise arise from measuring the financial assets or recognising the gains and losses on them on different bases; or
- applies to a group of financial assets, financial liabilities or both that is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the key Management; or
- · relates to financial assets containing one or more embedded derivative that significantly modifies the cash flow resulting from those financial assets

These assets are recognised initially at fair value, with transaction costs taken directly to the income statement, and are subsequently re-measured at fair value.

2.8 金融資產 (續)

2.8 Financial assets (continued)

(1) 以公平值變化計入損益的金融資產 (續)

該等資產的公平值變化所產生的損益(不包括利息部分)計入淨交易性收入或界定爲以公平值變化計入損益之金融工具淨收益/虧損。而利息部分則計入作爲利息收入之一部分。此類資產項下之股權工具,其股息於本集團收取股息之權利確定時,於綜合收益表內確認。

(2) 貸款及應收款

貸款及應收款是指具有固定或可確定支付金額且不在活躍市場報價的非衍生金融資產,主要包括銀行及其他金融機構結餘及存款、沒有活躍市場的債券投資和客戶貸款及應收款。當本集團直接向債務人提供資金、貨品或服務,而沒有出售應收款的意圖時,本集團將其確認爲貸款及應收款。貸款及應收款以公平值加上直接相關的交易費用進行初始入賬,並以使用實際利息法計算的攤餘成本扣除減值損失準備進行後續計量。

(3) 持有至到期日投資

分類爲持有至到期日投資類別是指 能於活躍市場中買賣,並擁有固定或 可確定之還款額及還款期,以及本集 團管理層有意向及能力持有至到期 日之金融資產。如本集團所出售的持 有至到期日投資(i)並非因不受本集 團控制、非經常性及本集團不能合理 預期的個別事件而出售,例如發行人 信用狀況嚴重變壞;或(ii)佔持有至 到期日資產中多於不重大部分,則整 個資產類別將受到影響,需要重新分 類至可供出售金融資產。持有至到期 日投資以公平値加上直接相關的交 易費用進行初始入賬,並以實際利息 法計算的攤餘成本扣除減值損失準 備進行後續計量。

(1) Financial assets at fair value through profit or loss (continued)

Gains and losses from changes in the fair value of such assets (excluding the interest component) are reported in net trading income or net gain/loss on financial instruments designated at fair value through profit or loss. The interest component is reported as part of interest income. Dividends on equity instruments of this category are recognised in the consolidated income statement when the Group's right to receive payment is established.

(2) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, including placements with and advances to banks and other financial institutions, investment debt securities without an active market and loans and advances to customers. They arise when the Group provides money, goods or services directly to a debtor with no intention of trading the receivable. They are initially recorded at fair value plus any directly attributable transaction costs and are subsequently measured at amortised cost using the effective interest rate method less allowances for impairment losses.

(3) Held-to-maturity

Financial assets classified as held-to-maturity are those traded in active markets, with fixed or determinable payments and fixed maturities that the Group's Management has both the positive intention and the ability to hold to maturity. Where the Group sold held-to-maturity assets (i) other than due to an isolated event beyond the Group's control, non-recurring and could not have been reasonably anticipated by the Group, such as a significant deterioration in the issuer's creditworthiness or (ii) other than an insignificant amount of held-to-maturity assets, the entire category would be tainted and reclassified as available-for-sale. They are initially recorded at fair value plus any directly attributable transaction costs, and are subsequently measured at amortised cost using the effective interest method less allowances for impairment losses.

(4) 可供出售金融資產

可供出售金融資產包括界定為此類的金融資產以及不屬於以上分類的金融資產。此等金融資產的持有期限不確定,但有可能依據流動資金需求或利率、匯率及權益價格的變動而被出售。

可供出售金融資產以公平值加上直接相關的交易費用進行初始入賬,並以公平值進行後續計量。因該等投資之公平值變化而產生之未實現盈虧直接確認在其他全面收益中;當該類金融資產被出售或減值時,之前確認於權益儲備中的累計收益或損失將轉入收益表內。惟包括折溢價攤銷的利息收入將按照實際利息法計算確認在收益表中。分類爲可供出售之股權工具,其股息於本集團收取股息之權利確定時於其他經營收入內確認。

可供出售證券的兌換差額的處理方 法詳見附註**2.4**。

2.9 金融負債

本集團按以下類別分類金融負債:交易性負債、以公平值變化計入損益的金融負債、存款、已發行債務證券、後償負債及其他負債。所有金融負債於交易發生時界定其分類並以公平值進行初始確認。

(1) 交易性負債

旨在短期內購回之金融負債被分類 為持作交易用途之負債。除被界定為 有效對沖工具外,所有衍生金融工具 均被分類為持作交易用途類別。交易 性負債以公平值列賬,公平值之變動 所產生的盈利或虧損確認於收益表 內。

(4) Available-for-sale

Financial assets classified as available-for-sale are those that are either designated as such or are not classified in any of the other categories. They are intended to be held for an indefinite period of time but may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

Available-for-sale financial assets are initially recorded at fair value plus any directly attributable transaction costs, and are subsequently measured at fair value. Unrealised gains and losses arising from changes in the fair value of investments are recognised directly in other comprehensive income, until the financial asset is disposed of or impaired at which time the cumulative gain or loss previously recognised in equity should be transferred to the income statement. However, interest income which includes the amortisation of premium and discount is calculated using the effective interest method and is recognised in the income statement. Dividends on equity instruments classified as available-for-sale are recognised in the other operating income when the Group's right to receive payment is established.

The treatment of translation differences on available-for-sale securities is dealt with in Note 2.4.

2.9 Financial liabilities

The Group classifies its financial liabilities under the following categories: trading liabilities, financial liabilities at fair value through profit or loss, deposits, debt securities in issue, subordinated liabilities, and other liabilities. All financial liabilities are classified at inception and recognised initially at fair value.

(1) Trading liabilities

A financial liability is classified as held for trading if it is incurred principally for the purpose of repurchasing in the short term. Derivatives are also classified as held for trading unless they are designated as effective hedges. It is measured at fair value and any gains and losses from changes in fair value are recognised in the income statement.

A financial liability can be designated at fair value through profit or loss if it is so designated at inception. Financial liabilities so designated include certain certificates of deposit issued and certain deposits received from customers that are embedded with derivatives. A financial liability is typically so designated if it meets one of the following criteria:

(3) 存款及其他負債

(3) Deposits and other liabilities

除被分類爲交易性負債或以公平值變 化計入損益的金融負債外,其他存款及 其他負債均以攤餘成本或成本列賬。扣 除交易費用後之淨收款和贖回價值的 差額(如有),按照實際利息法於期內 在收益表中確認。 Deposits and other liabilities, other than those classified as trading liabilities or designated at fair value through profit or loss, are carried at amortised cost or at cost. Any difference (if available) between proceeds net of transaction costs and the redemption value is recognised in the income statement over the period using the effective interest method.

2.10 財務擔保合約

2.10 Financial guarantee contracts

財務擔保合約是指簽發人在指定的債務 人未能根據持有人與債務人之間的債務 合約條款履行還款責任情況下,需向持有 人償付由此而產生損失的指定金額。 Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a contract between the holder and the debtor

財務擔保合約以合約簽發當日的公平値初始確認爲金融負債,並於財務報表內列示在「其他賬項及準備」項下。及後,本集團之責任按以下兩者之較高者計量:(i)根據香港會計準則第37號「準備、或然負債及或然資產」釐定之金額;及(ii)初始確認之金額減按直線法於擔保有效期內確認之累計攤銷(如適用)。財務擔保合約負債的變動則於收益表中確認。

Financial guarantees are initially recognised as financial liabilities and reported under "Other accounts and provisions" in the financial statements at fair value on the date the guarantee was given. Subsequent to initial recognition, the Group's liabilities under such guarantees are measured at the higher of (i) the amount determined in accordance with HKAS 37 "Provisions, Contingent Liabilities and Contingent Assets" and (ii) the amount initially recognised less, where appropriate, accumulated amortisation recognised over the life of the guarantee on a straight-line basis. Any changes in the liability relating to financial guarantees are taken to the income statement.

交易性負債、被界定爲以公平值變化計入損益的金融負債、及已發行債務證券於交易當日確認。交易性負債以外的存款在收到客戶款項時確認,而其他負債於有關責任產生時確認。只有當合約中的指定責任被履行、取消或到期,該金融負債才可從資產負債表上終止確認。如本集團回購本身的債務,則該債務將從資產負債表上終止,而該債務之賬面值及支付金額的差額被確認爲淨交易性收益/虧損。

售出予交易對手之證券及票據,如根據 回購協議,附有按預定價格並於將來指 定時間回購之責任稱爲「回購」。而向 交易對手購入之證券及票據,如根據回 售協議,附有按預定價格於將來指定時 間再出售予交易對手之責任則稱爲「反 向回購」。

2.11 Recognition and derecognition of financial instruments

Purchases and sales of financial assets at fair value through profit or loss, available-for-sale and held-to-maturity securities are recognised on the trade date, the date on which the Group purchases or sells the assets. Loans and receivables (except investment securities without an active market) are recognised when cash is advanced to the borrowers. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or where the Group has transferred substantially all risks and rewards of ownership. When the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset, the Group either continues to recognise the transferred financial asset to the extent of its continuing involvement if control remains or derecognise it if there is no retained control.

Trading liabilities, financial liabilities designated at fair value through profit or loss and debt securities in issue are recognised on the trade date. Deposits other than trading liabilities are recognised when money is received from customers, other liabilities are recognised when such obligations arise. Financial liabilities are derecognised from the balance sheet when and only when the obligation specified in the contract is discharged, cancelled or expired. If the Group purchases its own debt, it is removed from the balance sheet, and the difference between the carrying amount of a liability and the consideration paid is included in net trading gain/ loss.

Securities and bills sold to a counter-party with an obligation to repurchase at a pre-determined price on a specified future date under a repurchase agreement are referred to as Repos. Securities and bills purchased from a counter-party with an obligation to re-sell to the counter-party at a pre-determined price on a specified future date under a resale agreement are referred to as Reverse repos.

Repos or securities lending are initially recorded as due to banks, placements from banks and other financial institutions, as appropriate, at the actual amount of cash received from the counter-party. Financial assets given as collateral for repurchase agreements are not derecognised and are recorded as investment securities or financial assets at fair value through profit or loss. Reverse repos or securities borrowing are initially recorded in the balance sheet as cash and due from banks or placements with banks and other financial institutions, as appropriate, at the actual amount of cash paid to the counter-party. Financial assets received as collateral under reverse repurchase agreements are not recognised on the balance sheet. The difference between sale and repurchase price is recognised as interest income or interest expense over the life of the agreements using the effective interest method.

2.12 釐定金融工具之公平值

於活躍市場內具報價之金融資產及金融負債,其公平值乃分別按當時之買盤價及當時之賣盤價釐定。若金融資產及金融負債所處之市場並不活躍(包括非上市證券),本集團會以估值方法釐定其公平值,包括運用當時之公平市場交易、貼現現金流量分析、期權定價模型及其他市場參與者通用之估值方法。

2.13 金融資產減值

本集團於每個會計結算日對個別或一組金融資產是否存在減值的客觀證據進行評估。當有客觀減值證據表明金融資產在初始確認後因發生一項或多項事件(「損失事件」),且該損失事件對可靠估計該項金融資產或該組金融資產的預計未來現金流產生影響時,則該項或該組金融資產被認定爲已發生減值並出現減值損失。顯示個別或一組金融資產可能出現減值之客觀證據包括本集團已注意到相關可供觀察資料之以下可能出現之損失事件:

- (i) 發行人或欠債人遇到嚴重財政困 難;
- (ii) 違約,例如逾期或拖欠利息或本金 還款;
- (iii) 因應與借款人之財政困難相關之 經濟或法律原因,本集團給予借款 人在一般情況下放款人不予考慮 之優惠條件;
- (iv) 借款人有可能破產或進行其他財 務重組;
- (v) 因財政困難至使該金融資產之活 躍市場消失或其投資評級被降至 投資級別以下;或
- (vi) 可察覺的資料顯示某一金融資產 組合所產生之未來預計現金流量 將較最初確認時有可量度之下 降,雖然有關下降並未能明確爲該 組合內之個別金融資產。資料包 括:
 - 該組合之供款人之還款狀況有 不利轉變;或
 - 與該組合資產之逾期還款相關 之全國性或本地經濟狀況。

2.12 Determination of fair value of financial instruments

The fair values of financial assets and financial liabilities that are quoted in active markets are based on current bid prices and current ask prices respectively. If the market for financial assets and financial liabilities is not active (such as unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants.

2.13 Impairment of financial assets

The Group assesses as at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. Objective evidence that a financial asset or group of financial assets may be impaired includes observable data that comes to the attention of the Group about the following probable loss events:

- $\hbox{(i)} \quad \text{significant financial difficulty of the issuer or obligor};\\$
- (ii) a breach of contract, such as a default or delinquency in interest or principal payment;
- (iii) the Group granting to the borrower, for economic or legal reasons relating to the borrower's financial difficulty, a concession that the lender would not otherwise consider;
- (iv) it becoming probable that the borrower will enter into bankruptcy or other financial reorganisation;
- (v) the disappearance of an active market or downgrading below investment grade level for that financial asset because of financial difficulties; or
- (vi) observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group, including:
 - adverse changes in the payment status of borrowers in the group;
 - national or local economic conditions that correlate with defaults on the assets in the group.

(1) 以攤餘成本計量的資產

本集團首先對單項金額重大的金融 資產是否存在減值的客觀證據進行 個別評估。如果本集團沒有發現客 觀證據表明進行個別評估的金融資 產存在減值情況,本集團將其連同 其他單項金額不重大的金融資產包括在具 有類似信用風險特徵的金融資產組 別中,進行組合減值評估。經個別 進行減值評估並且已確認或繼續確 認減值損失的資產,不再納入組合 減值評估的範圍。

如果有客觀證據表明貸款及應收款 或持有至到期日證券已發生減值損 失,則其減值損失將按照該資產的 賬面金額與該金融資產按原來實際 利率貼現後的預計未來現金流(包括尚未發生的未來信用損失) 現值之間的差額進行計量。減值值 失通過使用準備金來減少該資產的 賬面金額,並確認於收益表內。 果貸款或持有至到期日投資爲浮率 則率,用於計量減值損失的貼現率 爲按合約確定的當前實際利率。實 務上,本集團亦可以採用觀察到的 市場價值確定某項金融工具的公平 值,並以此作爲基準計算減值。

附有抵押品的金融資產之預計未來 現金流的現值包含按照止贖抵押品 的價值扣除獲取和出售該抵押品之 成本後的現金流。

本集團在進行組合減値評估時,將 根據信用風險特徵的相似性和相關 性對金融資產進行分組。此等特徵 與預計該等資產組合之未來現金流 相關,可以反映債務人按照該等被 評估資產的合約條款償還所有到期 金額的能力。

對一組金融資產進行組合減值評估 測算時,其預計未來現金流乃按該 組資產的合約現金流以及於本集團 內與該組金融資產具有類似信用風 險特徵的資產的歷史損失經驗將根據當期 可觀察數據進行調整,以反映並不 會影響該段歷史損失期間的當前情 況,及從歷史損失經驗數據中移除 那些當期已不存在的影響事項。

(1) Assets carried at amortised cost

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment together with all other financial assets that are not individually significant or for which impairment has not yet been identified. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on loans and receivables or held-to-maturity securities has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the income statement. If a loan or held-to-maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Group may measure impairment on the basis of an instrument's fair value using an observable market price.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral.

For the purposes of a collective assessment of impairment, financial assets are grouped on the basis of similar and relevant credit risk characteristics. Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the group and historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently.

(1) 以攤餘成本計量的資產 (續)

當貸款無法收回時,在完成所有必要程序及確定損失金額後,本集團對該等貸款進行撤銷,沖減相應的貸款損失減值準備。撤銷後收回的貸款金額沖減在收益表中的貸款減值損失。

如果在以後的會計報表期間,減值 損失的金額減少,且該等減少與確 認減值後發生的事件有客觀關聯 (例如債務人信用評級的改善), 則之前已確認的減值損失可按該減 少之金額通過調整準備金予以回 撥,回撥的金額於收益表內確認。

當貸款條款經重新商訂後與原來出 現重大差異時,該貸款不再被視爲 逾期貸款,而作爲新貸款處理。

(2) 被分類爲可供出售的資產

如可供出售金融資產存在減值證據 時,其累計虧損一 即其購入成本或 攤餘成本與現時公平值之差額,扣 除該金融資產之前已記入收益表內 之累計減値損失- 需從權益儲備 撥轉至收益表內。對於被界定爲可 供出售的股權投資,在決定其是否 出現減値時,會考慮其公平值是否 嚴重地或長期地低於其成本。如日 後被分類爲可供出售金融資產之債 務工具之公平值增加,並與收益表 確認減値後發生之事項有客觀關 聯,有關之減值損失可按該增加之 金額於收益表內回撥。至於股權工 具方面,之後的公平值變化會透過 其他全面收益確認於可供出售投資 儲備,減值損失不會通過收益表回 撥。

(1) Assets carried at amortised cost (continued)

When a loan is uncollectible, it is written off against the related allowance for impairment losses. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off decrease the amount of impairment losses in the income statement.

If, in a subsequent period, the amount of allowance for impairment losses decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss to the extent of such a decrease is reversed by adjusting the allowance account. The amount of the reversal is recognised in the income statement.

Loans whose terms have been renegotiated with substantial difference in the terms are no longer considered to be past due but are treated as new loans.

(2) Assets classified as available-for-sale

If evidence of impairment exists for available-for-sale financial assets, the cumulative losses, measured as the difference between the acquisition cost or amortised cost and the current fair value, less any impairment loss on that financial asset previously recognised in the income statement, is removed from equity and recognised in the income statement. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the assets are impaired. If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the income statement, the impairment loss to the extent of such an increase is reversed through the income statement. With respect to equity instruments, further fair value changes are recognised in the reserve for fair value change of available-for-sale securities through other comprehensive income, impairment losses are not reversed through the income statement.

2.14 對附屬公司之投資及非金融資產之減

如因發生事件或情況已改變,並顯示 資產之賬面值或將無法被收回,則會 進行減值重檢。潛在減值跡象包括運 用資產之科技、市場、經濟或法律環 境已出現明顯變壞或資產價值大幅或 長期下跌至低於其成本值。

資產的賬面值超逾其可收回金額的部分會被確認爲減值損失。可收回金額是指資產的公平值扣除出售成本後與其使用價值的較高者。爲作出減值評估,資產乃按其最小的可分開識別現金流(現金產出單元)層次分類。於每一財務報告日,會對已發生減值的資產進行重檢以確定需否回撥。

在本銀行的財務報表,如果附屬公司 宣派的股息超過其在該宣派年度的全 面收益總額,或其在本銀行的賬面值 超過在其綜合資產負債表內已包括商 譽的淨資產值時,則需要做投資減值 測試。

2.15 投資物業

持作賺取長期租金收益或資本增值或兩者兼備者,且並非集團旗下各公司所佔用之物業,均列作投資物業。出租予本集團內公司之物業,於個別公司之財務報表中分類爲投資物業,及於綜合財務報表中分類爲房產。若經營租賃中之土地部分符合投資物業。經營租賃當爲融資租賃處理。

投資物業初始以成本值(包括相關交易成本)計量。經初始確認後,投資物業按專業估價師以公開市值爲基礎評估所得出之公平值計量。若沒有公開市值的相關資料,則會使用其他估值方法代替,例如在較不活躍市場的最近價格或以貼現現金流量估算。此等估值均按香港測量師學會所頒佈的物業估值準則進行。

2.14 Impairment of investment in subsidiaries and non-financial assets

Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Potential indications of impairment may include significant adverse changes in the technological, market, economic or legal environment in which the assets operate or whether there has been a significant or prolonged decline in value below their cost.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units). Assets that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

In the Bank's financial statements, impairment testing of the investment in a subsidiary is also required upon receiving dividend from that entity if the dividend exceeds the total comprehensive income of that entity concerned in the period the dividend is declared or if the carrying amount of that entity in the Bank's statement of financial position exceeds the carrying amount of that entity's net assets including goodwill in its consolidated balance sheet.

2.15 Investment properties

Properties that are held for long-term rental yields or for capital appreciation or both, and that are not occupied by the companies in the Group, are classified as investment properties. Properties leased out within Group companies are classified as investment properties in individual companies' financial statements and as premises in consolidated financial statements. Land held under operating lease is classified and accounted for as investment property when the rest of the definition of investment property is met. The operating lease is accounted for as if it is a finance lease.

Investment properties are recognised initially at cost, including related transaction costs. After initial recognition, investment properties are measured at fair value assessed by professional valuers on the basis of open market value. If information of open market value is not available, alternative valuation methods are used such as recent prices on less active markets or discounted cash flow projections. These valuations are performed in accordance with valuation standards on properties published by The Hong Kong Institute of Surveyors.

2.15 投資物業 (續)

只有在與項目相關的未來經濟利益很有可能流入本集團,並能夠可靠地計量其成本的情況下,本集團才會將其後續支出計入爲資產賬面值之一部分。該等後續支出以扣除減值後之成本列賬,並包括於投資物業的賬面值內。若其後開始產生經濟利益,則以公平值計量。至於所有其他修理及維護費用,均需於產生時確認於當期收益表內。

任何公平值之變動會直接於收益表內 反映。

若投資物業改爲自用,會被重新分類爲房產,其於重新分類日之公平值會成爲其會計賬上的成本值。若房產項目因其用途改變而成爲投資物業,則根據香港會計準則第16號「物業、器材及設備」將此項目於轉分類日之賬面值與其公平值之間的差額作爲房產重估,確認於其他全面收益內。惟若公平值增值抵銷以往之重估損失或減值損失,該增值則於收益表內確認,並以過往已確認的損失金額爲限。

2.16 物業、器材及設備

物業主要爲分行及辦公樓房產。房產需定期但最少每年以取自外間獨立估價師之公平值扣除隨後發生之累計折舊及累計資產減值損失列示。重估當日之累計折舊額需先沖銷資產之賬面毛值,沖減後之淨額則重新調整至該資產之重估值。相隔期間由董事參考相近物業之公開市值以檢討房產之賬面值,如董事認爲該房產價值有重大變動則會作出相應調整。

所有器材及設備均以歷史成本扣除累計折舊及減值列賬。歷史成本包括因取 得及安裝該項目而直接產生之費用。

與資產有關的後續支出,只有當其產生的未來經濟利益很可能流入本集團,並且該支出能夠可靠地計量時,才能將其計入資產的賬面價值或作爲單獨的一項資產進行確認(如適當)。該等後續支出以扣除減值後之成本列賬直至其開始產生經濟利益,之後則根據相關資產之後續計量基準進行計量。所有其他修理維護費用均在發生時計入當期收益表。

2. Summary of significant accounting policies (continued)

2.15 Investment properties (continued)

Subsequent expenditure is charged to the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The item is stated at cost less impairment and is included in the carrying amount of investment properties. Once the item begins to generate economic benefits, it is then measured at fair value. All other repairs and maintenance costs are expensed in the income statement during the financial period in which they are incurred.

Any changes in fair value are reported directly in the income statement.

If an investment property becomes owner-occupied, it is reclassified as premises, and its fair value at the date of reclassification becomes its cost for accounting purposes. If an item of premises becomes an investment property because its use has changed, any difference resulting between the carrying amount and the fair value of this item at the date of transfer is recognised in other comprehensive income as a revaluation of premises under HKAS 16 "Property, Plant and Equipment". However, if a fair value gain reverses a previous revaluation loss or impairment loss, the gain is recognised in the income statement up to the amount previously debited.

2.16 Properties, plant and equipment

Properties are mainly branch and office premises. Premises are shown at fair value based on periodic, at least annually, valuations by external independent valuers less subsequent accumulated depreciation and subsequent accumulated impairment losses. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. In the intervening periods, the directors review the carrying amount of premises, by reference to the open market value of similar properties, and adjustments are made when there has been a material change.

All plant and equipment are stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditures that are directly attributable to the acquisition and installation of the items.

Subsequent costs are included in an asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The item is stated at cost less impairment until it begins to generate economic benefits, then the item is subsequently measured according to the measurement basis of its respective assets class. All other repairs and maintenance costs are charged to the income statement during the financial period in which they are incurred.

- 物業 按政府土地租約餘期
- 器材及設備 3至15年之間

本集團在每個會計結算日重檢資產的可用年限,並已接適當情況作出調整。

在每個會計結算日,源自內部及外界之 資料均會被用作評定物業、器材及設備 是否出現減値之跡象。如該跡象存在, 則估算資產之可收回價值,及在合適情 況下將減值損失確認以將資產減至其 可收回價值。該等減值損失在收益表內 確認,但假若某資產乃按估值列賬,而 減值損失又不超過同一資產之重估盈 餘,此等損失則當作重估減值。可收回 價值指該資產之公平值扣除出售成本 後之金額,與其使用價值之較高者。減 值損失會按情況於房產重估儲備或收 益表內回撥。

出售之收益及虧損是按扣除稅項及費 用之出售淨額與有關資產賬面值之差 額而釐定,並於收益表內確認。

2.16 Properties, plant and equipment (continued)

Increases in the carrying amount arising on revaluation of premises are credited to the premises revaluation reserve through other comprehensive income. Decreases that offset previous increases of the same individual asset are charged against premises revaluation reserve through other comprehensive income; all other decreases are expensed in the income statement. Any subsequent increases are credited to the income statement up to the amount previously debited, and then to the premises revaluation reserve. Upon disposal of premises, the relevant portion of the premises revaluation reserve realised in respect of previous valuations is released and transferred from the premises revaluation reserve to retained earnings.

Depreciation is calculated on the straight-line method to write down the cost or revalued amount of such assets over their estimated useful lives as follows:

• Properties Over the life of government land leases

Plant and equipment 3-15 years

The useful lives of assets are reviewed, and adjusted if appropriate, as at the end of each reporting period.

At the end of each reporting period, both internal and external sources of information are considered to determine whether there is any indication that properties, plant and equipment, are impaired. If any such indication exists, the recoverable amount of the asset is estimated and where relevant, an impairment loss is recognised to reduce the asset to its recoverable amount. Such impairment loss is recognised in the income statement except where the asset is carried at valuation and the impairment loss does not exceed the revaluation surplus for that same asset, in which case it is treated as a revaluation decrease. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use. Impairment loss is reversed through the premises revaluation reserve or income statement as appropriate.

Gains and losses on disposals are determined by comparing proceeds with carrying amount, relevant taxes and expenses. These are included in the income statement.

2.17 租賃

(1) 經營租賃

經營租賃是指實質上由出租人保 留擁有資產之絕大部分風險及回 報之租賃。經營租賃之總租金款額 (扣除自出租人收取之任何回扣 額),將於租賃期內以直線法在收 益表中確認。

若經營租賃於租約到期前已結束, 任何需繳付予出租人之罰款將於結 束發生當月於收益表內確認爲支 出。經營租賃之租金收入在租約期 內以直線法確認。

(2) 融資租賃

如承租人已實質上獲得了所有風險 及回報,該資產的租賃應歸類爲融 資租賃。由於位於香港之土地的最 低租約付款的現值(即成交價)已 實質上等同於土地的公平價值,因 此香港政府土地的租賃被歸類爲融 資租賃,尤如屬無期業權。

融資租賃會在租賃開始時,按租賃資產之公平值與其最低租金付款的現值之較低者予以資產化。每期租金均會分配於負債及財務費用,以達至一個固定息率於融資餘額上。相應的租賃責任,在扣除財務費用後,會計入其他負債。按融資租賃方法購入的投資物業以公平值列賬。

當資產按融資租賃租出,租金的現 值會被確認為應收款項。租賃收入 是以投資淨額方法於租賃期內確 認,以反映固定的回報率。

2.18 現金及等同現金項目

就綜合現金流量表而言,現金及等同 現金項目指按原來到期日,於購入日 期起計三個月內到期之結餘,包括現 金、銀行及其他金融機構之結餘、短 期票據及被分類爲投資證券及存款證 之票據。

2.17 Leases

(1) Operating leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. The total payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognised as an expense in the period in which termination takes place. Rental income from operating leases is recognised on a straight-line basis over the lease term.

(2) Finance leases

Leases of assets where lessee have obtained substantially all the risks and rewards of ownership are classified as finance leases. Government land leases in Hong Kong are classified as finance leases as the present value of the minimum lease payments (ie. transaction price) of the land amounted to substantially all of the fair value of the land as if it were freehold.

Finance leases are capitalised at the lease's commencement at the lower of the fair value of the leased asset and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in other liabilities. Investment properties acquired under finance leases are carried at their fair value.

When assets are leased out under a finance lease, the present value of the lease payments is recognised as a receivable. Lease income is recognised over the term of the lease using net investment method, which reflects a constant periodic rate of return.

2.18 Cash and cash equivalents

For the purposes of the consolidated cash flow statement, cash and cash equivalents comprise balances with original maturity less than three months from the date of acquisition, including cash, balances with banks and other financial institutions, short-term bills and notes classified as investment securities and certificates of deposit.

退休計劃之資產與本集團之資產分開持有,並由獨立管理基金保管。

(2) 有償缺勤

僱員獲享之年度休假及病假在累 積時確認,本集團會對僱員服務至 會計結算日所累積,但尚未使用之 年度休假及預計所需支付之病假 作出估算及撥備。

除病假及經特別批准之年度休假外,其他有償缺勤均不允許累積。若僱員於獲享有償缺勤之年度內未能悉數享用該等可用缺勤,剩餘之可用缺勤將被取消。除未到期之休假外,僱員於離職時亦無權收取現金以彌補任何未被使用之可用缺勤。

(3) 獎金計劃

若因僱員提供之服務而令集團產生法律性或推定性之現有責任,而該責任之金額亦能可靠地作出估算,集團需確認該預期之獎金支出並以負債列賬。如獎金計劃之負債金額重大,且預期會於 12 個月後才被償付,會以貼現現金流方法確認。

2.19 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

2.20 Employee benefits

(1) Retirement benefit costs

The Group contributes to defined contribution retirement schemes under either recognised ORSO schemes or MPF schemes that are available to the Group's employees. Contributions to the schemes by the Group and employees are calculated as a percentage of employees' basic salaries for the ORSO schemes and in accordance with the MPF rules for MPF schemes. The retirement benefit scheme costs are charged to the income statement as incurred and represent contributions payable by the Group to the schemes. Contributions made by the Group that are forfeited by those employees who leave the ORSO scheme prior to the full vesting of their entitlement to the contributions are used by the Group to reduce the existing level of contributions or to meet its expenses under the trust deed of the ORSO schemes.

The assets of the schemes are held in independently-administered funds separate from those of the Group.

(2) Leave entitlements

Employee entitlements to annual leave and sick leave are recognised when they accrue to employees. A provision is made for the estimated liability for unused annual leave and the amount of sick leave expected to be paid as a result of services rendered by employees up to the end of the reporting period.

Compensated absences other than sick leave and special approved annual leaves are non-accumulating; they lapse if the current period's entitlement is not used in full. Except unexpired annual leaves, they do not entitle employees to a cash payment for unused entitlement on leaving the Group.

(3) Bonus plans

The expected cost of bonus payments are recognised as a liability when the Group has a present legal or constructive obligation as a result of services rendered by employees and a reliable estimate of the obligation can be made. Liabilities for bonus plans are expected to be settled longer than twelve months will be recognised using discounted cash flow method if the amounts are significant.

所有因綜合財務報表內資產及負債之 稅務基礎與其賬面值之暫時性差異而 產生之遞延所得稅項均以資產負債表 負債法提撥。遞延所得稅項是按會計結 算日已執行或實際會執行之稅率及稅 法,及預期於相關之遞延所得稅資產實 現時或遞延所得稅負債需清付時所適 用之稅率計算。

主要之暫時性差異源於資產減值準備、物業及設備之折舊、若干資產之重估,包括可供出售證券及物業、以及結轉之稅務虧損。除業務合併外,若資產或負債在交易初始確認時,並未有對會計損益或應課稅損益構成影響,則無需確認遞延所得稅項。

所有因應課稅暫時性差異而產生之遞 延所得稅項負債均會被確認,而當未來 之應課稅利潤預計可被用作抵扣暫時 性差異時,因該暫時性差異而產生之遞 延所得稅資產將被確認。

遞延所得稅項乃記於收益表內。但因可供出售證券的公平值重新計量及對物業之重估記入其他全面收益內,故由此產生的遞延稅項也記入其他全面收益內,並於以後隨著相關遞延收益和損失的確認而一同確認在收益表中。

投資物業的遞延稅項負債或遞延稅項 資產的計算方法是假設該等投資物業 是通過出售來回收其重估賬面值及採 用相關的稅率計算。

2.21 Current and deferred income taxes

Tax expenses for the period comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised directly in other comprehensive income. In this case, the tax is also recognised in other comprehensive income.

Income tax payable on profits, based on the applicable tax law enacted or substantially enacted at the end of the reporting period in each jurisdiction where the Bank and the subsidiaries operate and generate taxable income, is recognised as a current income tax expense in the period in which profits arise.

Deferred income tax is provided in full, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred income tax is determined using tax rates and laws that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

The principal temporary differences arise from asset impairment provisions, depreciation of property and equipment, revaluation of certain assets including available-for-sale securities and properties, and tax losses carried forward. However, the deferred income tax is not recognised if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

Deferred income tax liabilities are provided in full on all taxable temporary differences and deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is charged or credited in the income statement except for deferred income tax relating to fair value re-measurement of available-for-sale securities and revaluation of premises which are charged or credited to other comprehensive income, in which case the deferred income tax is also credited or charged to other comprehensive income and is subsequently recognised in the income statement together with the realisation of the deferred gain and loss.

Deferred tax liability or deferred tax asset arising from investment property is determined based on the presumption that the revaluation amount of such investment property will be recovered through sale with the relevant tax rate applied.

2. Summary of significant accounting policies (continued)

2.22 Repossessed assets

Repossessed assets are initially recognised at the lower of their fair value less costs to sell and the amortised cost of the related outstanding loans on the date of repossession, and the related loans and advances together with the related impairment allowances are derecognised from the balance sheet. Subsequently, repossessed assets are measured at the lower of their cost and fair values less costs to sell and are reported as 'non-current assets held for sale' included in 'Other assets'.

2.23 Fiduciary activities

The Group commonly acts as a trustee, or in other fiduciary capacities, that result in its holding or managing assets on behalf of individuals, trusts and other institutions. These assets and any gains or losses arising thereon are excluded from these financial statements, as they are not assets of the Group.

2.24 Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognised because it is not probable that an outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

A contingent liability is not recognised as a provision but is disclosed in the notes to the financial statements. When a change in the probability of an outflow occurs so that outflow is probable, it will then be recognised as a provision.

A contingent asset is a possible asset that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain events not wholly within the control of the Group.

Contingent assets are not recognised but are disclosed in the notes to the financial statements when an inflow of economic benefits is probable. When the inflow is virtually certain, it will be recognised as an asset.

判斷

本集團作出的會計估計和假設通常會影響下 ·會計年度的資產和負債的賬面價值。該等估 計及判斷是根據過往歷史經驗及於有關情況 下被認爲合理之其他因素,包括對未來事件的 預期而作出,並會持續接受評估。對因必要的 估計及判斷轉變,而會影響其賬面值的資產及 負債項目範圍,將列示如下。如可釐定,重要 假設或其他估量所存在之不明朗因素及其轉 變所帶來之影響將於以下列出。而未來有可能 根據實際情況的變化對這些會計估計做出重 大調整。

3.1 貸款及應收款減值準備

本集團至少每季對貸款組合的減值損 失情况進行一次評估。於決定是否確 認減值損失於收益表時,本集團於識 別某一貸款組合內個別貸款之減值損 失前,會首先判斷是否有可觀察數據 顯示該貸款組合所產生之未來預計現 金流量將出現有可量度之下降。該證 據包括能顯示該組合內借款人之還款 狀況有不利轉變的可觀察資料(如拖 欠或逾期還款)或與組合內貸款資產 違約有關的經濟狀況。管理層於估計 未來現金流量時,將根據具有與該組 合類似之信貸風險特徵及客觀減值證 據之資產之過往損失經驗作爲估計基 準。用作估計未來現金流量金額及時 間之方法及假設會被定期檢討。

截至 2012 年 12 月 31 日的貸款及應 收款賬面值已列示於本財務報表的附 註22。

3.2 持有至到期日和可供出售證券減值

本集團至少每季對其持有至到期日和 可供出售投資組合的減值損失情況進 行一次評估。於決定該等投資是否出 現減値時,會評估其風險特徵和表 現,例如外部評級、市場價值等。本 集團會參照該等組合的市場表現、發 行人的目前付款情況、相關資產表 現、與抵押資產違約直接相關的經濟 情況,而對每一項投資的違約率和損 失嚴重性作出估計。減值評估中所使 用的方法和假設會被定期檢討。

截至 2012 年 12 月 31 日的證券投資 賬面值已列示於本財務報表的附註 24 .

3. 應用會計政策時之重大會計估計及 3. Critical accounting estimates and judgements in applying accounting policies

The Group makes estimates and assumptions that affect the carrying amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Areas susceptible to changes in essential estimates and judgements, which affect the carrying amount of assets and liabilities, are set out below. The effect of changes to either the key assumptions or other estimation uncertainties will be presented below if it is practicable to determine. It is possible that actual results may require material adjustments to the estimates referred to below.

3.1 Impairment allowances on loans and advances

The Group reviews its loan portfolios to assess impairment at least on a quarterly basis. In determining whether an impairment loss should be recorded in the income statement, the Group makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans and advances before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group (e.g. payment delinquency or default), or economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when estimating expected future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly.

Carrying amounts of loans and advances as at 31 December 2012 are shown in Note 22 to the Financial Statements.

3.2 Impairment of held-to-maturity and available-for-sale securities

The Group reviews its held-to-maturity and available-for-sale investment portfolios to assess impairment at least on a quarterly basis. In determining whether any of these investments is impaired, risk characteristics and performance such as external credit rating, market price etc will be assessed. The Group makes estimates on the default rate and loss severity of each investment with reference to market performance of the portfolios, current payment status of the issuers or performance of the underlying assets, or economic conditions that correlate with defaults on the collateralised assets. The methodology and assumptions used for impairment assessments are reviewed regularly.

Carrying amounts of investment in securities as at 31 December 2012 are shown in Note 24 to the Financial Statements.

判斷 (續)

3.3 衍生金融工具的公平值

沒有活躍市場報價之衍生金融工具, 其公平值會根據估值方法釐定。所採 用之估值方法包括貼現現金流量分 析,以及從外間購入,並被業內廣泛 採用之財務分析或風險管理系統之內 置模型。若實際操作上可行,定價模 型將只採用可觀察數據。

截至 2012 年 12 月 31 日的衍生金融 工具賬面值已列示於本財務報表的附 註 21。

3.4 持有至到期日證券

本集團跟循香港會計準則第 39 號之 指引,將具有固定或確定付款額及還 款期的若干非衍生金融資產分類爲持 有至到期日證券。此分類需運用重大 判斷。於使用該判斷時,本集團會考 慮其持有之意向及能持有該資產至到 期日之能力。除香港會計準則第39號 所列出的特定情況外 (例如出售之金 額不重大;於接近到期日出售;或因 信貸顯著轉差而出售),若本集團未 能持有該等投資至到期日,則整個類 別需被重新分類爲可供出售證券,而 該投資將以公平值計量,而不能以攤 餘成本計量。

截至 2012 年 12 月 31 日的持有至到 期日證券賬面值已列示於本財務報表 的附註 24。

3. 應用會計政策時之重大會計估計及 3. Critical accounting estimates and judgements in applying accounting policies (continued)

3.3 Fair values of derivatives financial instruments

The fair values of derivatives financial instruments that are not quoted in active markets are determined by using valuation techniques. Valuation techniques used include discounted cash flows analysis and models with built-in functions available in externally acquired financial analysis or risk management systems widely used by the industry. To the extent practical, the models only use observable data.

Carrying amounts of derivative financial instruments as at 31 December 2012 are shown in Note 21 to the Financial Statements

3.4 Held-to-maturity Securities

The Group follows the guidance of HKAS 39 in classifying certain non-derivative financial assets with fixed or determinable payments and fixed maturity as held-to-maturity securities. This classification requires significant management judgement to evaluate the Group's intention and ability to hold such investments to maturity. If the Group fails to hold these investments to maturity other than for specific circumstances defined in HKAS 39, such as selling an insignificant amount, selling close to maturity or due to significant credit deterioration of such investments, it will be required to reclassify the entire portfolio of financial assets as available-for-sale securities. The investments would then be measured at fair value and not amortised cost.

Carrying amounts of Held-to-maturity securities as at 31 December 2012 are shown in Note 24 to the Financial Statements.

The Group has put in place appropriate internal control systems, including establishment of an organisation structure that sets clear lines of authority and responsibility for monitoring compliance with policies, procedures and limits. Proper reporting lines also provide sufficient independence of the control functions from the business areas, as well as adequate segregation of duties throughout the organisation which helps to promote an appropriate internal control environment.

To ensure effective risk assessment and monitoring, the Group developed a comprehensive product development and management framework which clearly defines the roles and responsibilities of all related units, and the proper risk assessment procedures for the product development process.

In accordance with the strategic objectives set by the Board and the Management, the respective product management units are responsible for formulating business and product development plans, and the department of strategic development shall ensure the plans are aligned with the Group's overall strategies. The Head of OCD is responsible for the management of credit risk and for the formulation of all credit policies and procedures. Various units of the Group have their respective credit risk management responsibilities. Business units act as the first line of defence. The Risk and Credit Management Division ("CMD"), which is independent from the business units, is responsible for the day-to-day management of credit risks and has the primary responsibility for providing an independent due diligence through identifying, measuring, monitoring and controlling credit risk to ensure an effective checks and balances, as well as drafting, reviewing and updating credit risk management policies and procedures.

The Board of Directors delegates credit approval authority to the CE. The CE can further delegate to the subordinates within her limit authorised by the Board of Directors. The Group sets the limits of credit approval authority according to the business nature, rating, the level of transaction risk, and the extent of the credit exposure.

Credit risk measurement and control

In view of the rapidly changing market conditions, the Group has been continuously revisiting its credit strategies and conducting rigorous reviews on the concerned portfolios.

Loans and advances

Different credit approval and control procedures are adopted according to the level of risk associated with the customer, counterparty or transaction. Credit applications for non-retail exposure are independently reviewed and objectively assessed by risk management units. Obligor ratings (in terms of PD) and facility ratings (in terms of LGD) are assigned to these portfolios to support credit approval. Retail internal rating systems are deployed in risk assessment of retail credit transactions, including small business retail exposures, residential mortgage loans, personal loans and credit cards. Loan grades, obligor and facility ratings as well as loss estimates (if applicable) are used to support credit approval.

The Group uses loan grades, obligor ratings and loss estimates (if applicable) to support credit monitoring, analysis and reporting. For corporates and financial institutions, more frequent rating review and closer monitoring are required for higher-risk customers. For retail exposures, monthly updated internal ratings and loss estimates are used for credit monitoring on a portfolio basis. More comprehensive review is required for obligors being identified under high-risk pools.

The Group has established credit master scale for internal rating purpose, which is in compliance with the Banking (Capital) Rules under the Hong Kong Banking Ordinance on internal rating structure, and can be mapped to Standard & Poor's external ratings.

CMD provides regular credit management information reports and ad hoc reports to the Board of Management, RC and Board of Directors to facilitate their continuous monitoring of credit risk.

The Group identifies credit concentration risk by industry, geography, customer and counterparty risk. The Group monitors changes to counterparties credit risk, quality of the credit portfolio and risk concentrations, and reports regularly to the Group's management.

As of 31 December 2012, the Group continues to adopt loan grading criteria which divide credit assets into 5 categories with reference to HKMA's guidelines, as below:

"Pass" represents loans where the borrower is current in meeting its repayment obligations and full repayment of interest and principal is not in doubt.

"Special Mention" represents loans where the borrower is experiencing difficulties which may threaten the Group's position. Ultimate loss is not expected at this stage but could occur if adverse conditions persist.

"Substandard" represents loans where the borrower displays a definable weakness that is likely to jeopardise repayment.

"Doubtful" represents loans where collection in full is improbable and the Group expects to sustain a loss of principal and/or interest, taking into account the net realisable value of the collateral

"Loss" represents loans which are considered uncollectible after all collection options (such as the realisation of collateral or the institution of legal proceedings) have been exhausted.

Debt securities and derivatives

For investments in debt securities, the obligor ratings or external credit ratings, assessment of the underlying assets and credit limits setting on customer/security issuer basis are used for managing credit risk associated with the investment. For derivatives, the Group sets customer limits to manage the credit risk involved and follows the same approval and control processes as applied for loans and advances. Ongoing monitoring and stop-loss procedures are established.

Settlement risk arises mainly from foreign exchange transactions with counterparties and also from derivatives in any situation where a payment in cash, securities or equities is made in the expectation of a corresponding receipt in cash, securities or equities. Daily settlement limits are established for each counterparty or customer to cover all settlement risk arising from the Group's market transactions on any single day.

Collateral held as security and other credit enhancements

The valuation and management of collateral have been documented in the credit risk management policies and procedures which cover acceptance criteria, validity of collateral, loan-to-value ratio, haircut ratio, valuation and insurance, etc. The collateral is revalued on a regular basis, though the frequency and the method used varies with the type of collateral involved and the nature and the risk of the underlying credit. The Group has established a mechanism to update the value of its main type of collateral, real estate properties, with the use of public indices on a portfolio basis. Collateral is insured with the Group as the beneficiary. In the personal sector, the main types of collateral are real estate properties, cash deposits and securities. In the commercial and industrial sector, the main types of collateral are real estate properties, securities, receivables, cash deposits and machinery.

For loans guaranteed by a third party, the Group will assess the guarantor's financial condition, credit history and ability to meet obligations.

As at 31 December 2012 and 2011, the Group did not hold any collateral that it was permitted to sell or re-pledge in the absence of default by the borrower.

A. 信貸風險承擔

A. Credit exposures

本集團之最高信貸風險承擔是未 考慮任何抵押品或其他改善信貸 條件。對於資產負債表內資產,最 高信貸風險承擔相等於其賬面 値。對於開出擔保函,最高信貸風 險承擔是被擔保人要求本集團代 爲償付債務的最高金額。對於貸款 承擔及其他信貸有關負債,最高信 貸風險承擔爲信貸承諾的全額。 The maximum exposure is a worst case scenario of credit risk exposure to the Group without taking account of any collateral held or other credit enhancements. For on-balance sheet assets, the maximum exposure to credit risk equals their carrying amount. For letters of guarantee issued, the maximum exposure to credit risk is the maximum amount that the Group could be required to pay if the guarantees are called upon. For loan commitment and other credit related liabilities, the maximum exposure to credit risk is the full amount of the committed facilities.

以下爲所持抵押品及其他改善信 貸條件的性質及其對本集團各類 金融資產的覆蓋程度。

The nature of the collateral held and other credit enhancements and their financial effect to the different classes of the Group's financial assets are as follows.

在銀行及其他金融機構的結餘及 定期存放

Balances and placements with banks and other financial institutions

考慮到交易對手的性質,一般會視 爲低風險承擔。因此一般不會就此 等資產尋求抵押品。 These exposures are generally considered to be low risk due to the nature of the counterparties. Collateral is generally not sought on these assets.

公平值變化計入損益之金融資產 及證券投資

Financial assets at fair value through profit or loss and investment in securities

一般不會就債務證券尋求抵押品。

Collateral is generally not sought on debt securities.

衍生金融工具

Derivative financial instruments

本集團傾向以國際掉期業務及衍生投資工具協會總協議作爲衍生工具業務的協議文件。該協議爲敘做場外交易產品提供主體合約模式,倘若任何一方違約或提早終止交易,則合約限定雙方對協議涵蓋的未平倉交易須採用淨額結算。

The International Swaps and Derivatives Association Master Agreement is the preferred agreement for documenting derivatives activities of the Group. It provides the contractual framework within which dealing activities of OTC products are conducted, and contractually bind both parties to apply close-out netting on outstanding transactions covered by an agreement if either party defaults or another pre-agreed termination event occurs.

貸款及其他賬項、或然負債及承擔

Advances and other accounts, contingent liabilities and commitments

一般抵押品種類已載於第64頁。對貸款及其他賬項、或然負債及承擔,本集團會考慮適當之抵押品去評估個別風險承擔。有關客戶貸款之抵押品覆蓋率已分析於第75至76頁。或然負債及承擔之主要組合及性質已載於附註36。就不需事先通知的無條件撤銷之承諾,如客戶的信貸質素下降,本集團會評估撤回其授信額度的需要性。於2012年12月31日,有抵押品覆蓋之或然負債及承擔爲10.02%(2011年:11.16%)。

The general types of collateral are disclosed on page 64. Advances and other accounts, contingent liabilities and commitments are collateralised to the extent considered appropriate by the Group taking account of the risk assessment of individual exposures. The collateral coverage of advances to customers is analysed on pages 75 to 76. The components and nature of contingent liabilities and commitments is disclosed in Note 36. Regarding the commitments that are unconditionally cancellable without prior notice, the Group would assess the necessity to withdraw the credit line in case where the credit quality of a borrower deteriorates. For contingent liabilities and commitments, 10.02% (2011: 11.16%) is covered by collateral as at 31 December 2012.

有明確到期日之貸款,若其本金或利息已逾期及仍未 償還,則列作逾期貸款。須 定期分期償還之貸款,若其 中一次分期還款已逾期及 仍未償還,則列作逾期處 理。須即期償還之貸款若已 向借款人送達還款通知,但 借款人未按指示還款,或貸 款一直超出借款人獲通知 之批准貸款限額,亦列作逾 期處理。 Advances with a specific repayment date are classified as overdue when the principal or interest is past due and remains unpaid. Advances repayable by regular instalments are classified as overdue when an instalment payment is past due and remains unpaid. Advances repayable on demand are classified as overdue either when a demand for repayment has been served on the borrower but repayment has not been made in accordance with the instruction or when the advances have remained continuously outside the approved limit that was advised to the borrower.

當有客觀證據反映貸款出 現一項或多項損失事件,經 過評估有關損失事件已影 響其預期可靠的未來現金 流,則該貸款已出現減值損 失。 Advances are impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred and that loss event(s) has an impact on the estimated future cash flows of the advances that can be reliably estimated.

如有客觀證據反映貸款已 出現減值損失,有關損失按 賬面值與未來現金流折現 值兩者間之差額計量;貸款 已出現減值損失的客觀證 據包括那些已有明顯訊息 令本集團知悉發生了損失 事件。

If there is objective evidence that an impairment loss on advances has been incurred, the amount of loss is measured as the difference between the carrying amount and the present value of estimated future cash flows generated by the advances. Objective evidence that advances are impaired includes observable data that comes to the attention of the Group about the loss events.

本集團根據以下客觀證據 來決定是否已出現減值損 失:

The criteria that the Group uses to determine that there is objective evidence of an impairment loss include:

- ·借款人出現重大的財 務困難;
- 出現違約事件,例如不履行或逾期償還本金或利息;
- 當借款人出現財務困難,本集團基於經濟或法律因素考慮而特別給予借款人貸款條件上的優惠;
- 有證據顯示借款人將 會破產或進行財務重 整;或
- 其他明顯訊息反映有關貸款的未來現金流 將會出現明顯下降。

- · Significant financial difficulty incurred by the borrower;
- A breach of contract, such as a default or delinquency in interest or principal payment;
- For economic or legal reasons related to the borrower's financial difficulty, the Group has granted to the borrower a concession that it would not otherwise consider:
- Probable that the borrower will become bankrupt or undergo other financial reorganisation; or
- Other observable data indicating that there is a measurable decrease in the estimated future cash flows from such advances.

A. 風險値

本集團由 2012 年起採用風險 值量度一般市場風險,並定期 向風險委員會和高層管理人 員報告。本集團採用統一的風 險值計量模型,運用歷史模擬 続,以過去2 年的市場數據為 發展,計算 200%

參照,計算99% 置信水平下及 1 天持有期內集團層面的風險値,並設定集團總體的風險值限額。

下表詳述本集團一般市場風 險持倉的風險值¹。 The Group uses the VAR to measure and report general market risks to the RC and senior management on a periodic basis since 2012. The Group adopts a uniformed VAR calculation model, using historical simulation approach and 2-year historical data, to calculate the VAR of the Group over 1-day holding period with 99% confidence level, and sets up the VAR limit of the Group.

The following table sets out the VAR for all general market risk exposure of the Group.

2012 年本集團從市場風險相關的交易活動賺得的每日平均收益²為港幣 230,000 元。

In 2012, the average daily revenue² of the Group earned from market risk-related trading activities was HK\$230,000.

雖然風險值是量度市場風險的一 項重要指標,但也有其局限性, 例如: Although a valuable guide to risk, VAR should always be viewed in the context of its limitations. For example:

- 採用過往數據估計未來動態 未能估計所有可能出現的情 況,尤其是一些極端情況;
- the use of historical data as a proxy for estimating future events may not encompass all potential events, particularly those which are extreme in nature;
- 一日持倉期的計算方法假設 所有頭盤均可以在一日內套 現或對沖。這項假設未必能完 全反映市場風險,尤其在市場 流通度極低時,可能未及在一 日持倉期內套現或對沖所有 頭盤;
- the use of a one-day holding period assumes that all positions can be liquidated or hedged in one day. This may not fully reflect the market risk arising at times of severe illiquidity, when a one-day holding period may be insufficient to liquidate or hedge all positions fully;
- 根據定義,當採用 99% 置信 水平時,即未有考慮在此置信 水平以外或會出現的虧損;以 及
- the use of a 99% confidence level, by definition, does not take into account losses that might occur beyond this level of confidence; and
- 風險值是以營業時間結束時 的頭盤作計算基準,因此並不 一定反映交易時段內的風險。
- VAR is calculated on the basis of exposures outstanding at the close of business and therefore does not necessarily reflect intra-day exposures.

本集團充分了解風險值指標的局限性,因此,制定了壓力測試指標及限額以評估和管理風險值不能涵蓋的市場風險。市場風險壓力測試包括按不同風險因素改變的嚴峻程度所作的敏感性測試,以及對歷史事件的情景分析,如1987 股災、1994 債券市場危機、1997 亞洲金融風暴、2001 年美國 911 事件以及 2008 金融海嘯等。

The Group recognises these limitations by formulating stress test indicators and limits to assess and manage the market risk uncovered by VAR. The stress testing programme of the market risk includes sensitivity testing on changes in risk factors with various degrees of severity, as well as scenario analysis on historical events including the 1987 Equity Market Crash, 1994 Bond Market Crash, 1997 Asian Financial Crisis, 2001 9-11 event and 2008 Financial Tsunami, etc.

B. 外匯風險

B. Currency risk

本集團的資產及負債均以主要貨幣為主,尤其集中在港元、美元及人民幣。為確保外匯風險承擔保持在可接受水平,集團利用風險限額(例如頭盤及風險値限額)作為監控工具。此外,集團致力於減少相同貨幣資產與負債的錯配,並通常利用外匯合約(例如外匯掉期)管理由外幣資產負債所產生的外匯風險。

The Group's assets and liabilities are denominated in major currencies, particularly the Hong Kong dollar, the US dollar and Renminbi. To ensure the currency risk exposure of the Group is kept to an acceptable level, risk limits (e.g. Position and VAR limit) are used to serve as a monitoring tool. Moreover, the Group seeks to minimise the gap between asset and liability in the same currency. Foreign exchange contracts (e.g. FX swap) are usually used to manage FX risk associated with foreign currency-denominated assets and liabilities.

C. 利率風險

利率風險是指因利率水平、資產負 債期限結構等要素發生不利變動 而可能導致銀行整體收益和經濟 價值承受損失。本集團的利率風險 主要來自銀行賬下的結構性持 倉。結構性持倉的主要利率風險類 別爲:

- 利率重訂風險 資產與負債的 到期日或重訂價格期限可能錯 配,進而影響淨利息收益;
- 利率基準風險 不同交易的定 價基準不同,令資產的收益率和 負債的成本可能會在同一重訂價 格期間以不同的幅度變化;
- 收益率曲線風險 由於收益率 曲線非平行式移動而對淨利息收 入或經濟價值產生負面影響;
- 客戶擇權風險 由於資產、負 債或表外項目附設有期權,當期 權行使時會改變相關資產或負債 的現金流。

本集團風險管理管治架構同樣適 用於利率風險管理。根據風險管理 委員會批准的《利率風險管理政 策》,資產負債管理委員會具體履 行管理集團利率風險的職責。財務 處是利率風險管理的主責單位,在 財資業務處的配合下,協助資產負 債管理委員會開展日常的利率風 險管理工作,包括但不限於起草管 理政策,選擇管理方法,設立風險 指標和限額,評估目標資產負債平 衡表,監督利率風險管理政策與限 額執行情況,向高層管理人員以及 風險管理委員會提交利率風險管 理報告等。

C. Interest rate risk

Interest rate risk means the risks to a bank's earnings and economic value arising from adverse movements in interest rate and term structures of the bank's asset and liability positions. The Group's interest rate risk exposures are mainly structural. The major types of interest rate risk from structural positions are:

- Repricing risk mismatches in the maturity or repricing periods of assets and liabilities that may affect net interest income;
- Basis risk different pricing basis for different transactions so that the yield on assets and cost of liabilities may change by different amounts within the same repricing period;
- Yield curve risk non-parallel shifts in the yield curve that may have an adverse impact on net interest income or economic value;
- Option risk exercise of the options embedded in assets, liabilities or off-balance sheet items that can cause a change in the cash flows of assets and liabilities.

The Group's risk management framework applies also to interest rate risk management. ALCO exercises its oversight of interest rate risk in accordance with "Interest Rate Risk Management Policy" as approved by the RC. Finance Division is the unit responsible for interest rate risk management. With the cooperation of Treasury Division, Finance Division assists the ALCO to manage day-to-day interest rate risk positions. Its roles include, but are not limited to, formulation of management policies, selection of methodologies, setting risk indicators and limits, assessment of target balance sheet, monitoring the compliance with policies and limits, and submission of interest rate risk management reports to the RC and senior management, etc.

本集團設定利率風險指標及限 額,用於識別、計量、監測和控制 利率風險。主要風險指標和限額包 括但不限於重定價缺口、利率基準 風險、淨利息波動比率(NII)、經 濟價值波動比率 (EV) (包括可供 出售債券組合 EV 限額)等。主要 風險指標和限額視管理需要劃分 爲兩個層級,分別由風險管理委員 會和資產負債管理委員會批准。承 擔利率風險的各業務單位必須在 批核的利率風險指標限額範圍內 開展相關業務。集團推出銀行賬新 產品或新業務前,須先執行風險評 估程序,包括評估其潛在的利率風 險,並考慮現行的利率風險監控機 制是否足夠。如擬推出的新產品或 新業務對銀行利率風險造成重大 影響,須向營運及調控部主管提交 建議,並報風險管理委員會批准。

The Group set out interest rate risk indicators and limits to identify, measure, monitor and control interest rate risk. The indicators and limits include, but are not limited to, re-pricing gap limits, basis risk, net interest income sensitivity ratio, economic value sensitivity ratio (including sub-limit for AFS securities), etc. The indicators and limits are classified into two levels, which are approved by the RC and ALCO respectively. Risk-taking business units are required to conduct their business within the boundary of the interest rate risk limits. Before launching a new product or business in the banking book, relevant departments are required to go through a risk assessment process, which includes assessment of underlying interest rate risk and consideration of the adequacy of current risk monitoring mechanism. Any material impact on interest rate risk noted during the risk assessment process will be reported to the Head of OCD and submitted to the RC for approval.

淨利息波動比率(NII)和經濟價值 波動比率(EV)反映利率變動對 集團淨利率收入和資本基礎的影響,是本集團管理利率風險的重要 風險指標。前者衡量利率變動導致 的淨利息收入變動佔當年預算淨 利息收入的比率;後者衡量利率變 化對銀行經濟價值(即按市場利率 折算的資產、負債及表外業務預測 現金流的淨現值)的影響佔最新資 本基礎的比率。風險管理委員會爲 這兩項指標設定限額,用來監測和 控制集團銀行賬利率風險。 Net interest income sensitivity ratio (NII) and economic value sensitivity ratio (EV) assess the impact of interest rate movement on the Group's net interest income and capital base. They are the Group's key interest rate risk indicators. The former assesses the impact of interest rate movement on net interest income as a percentage to projected net interest income for the year. The latter assesses the impact of interest rate movement on economic value (i.e. the present value of cash-flows of assets, liabilities and off-balance-sheet items discounted using market interest rate) as a percentage to the latest capital base. Limits are set by RC on these two indicators to monitor and control the Group's banking book interest rate risk.

本集團採用情景分析和壓力測試 方法,評估不利市況下銀行賬可能 承受的利率風險。選擇活期及儲蓄 存款客戶擇權及按揭客戶提早還 款的情景,測試可能產生的利率風 險,及其對銀行預期利息收益和經 濟價值乃至資本基礎的影響。 The Group uses scenario analysis and stress test to assess the banking book interest rate risk the Group would face under adverse circumstances. Scenario analysis and stress test are also devised to assess the impact on net interest income and economic value as well as capital base arising from the optionality of demand and savings deposits and the prepayment of mortgage loans.

D. 本集團市場風險承擔之敏感度 分析

分析 集團主要面對港元及美元利率 風險。於 2012 年 12 月 31 日,

風險。於2012年12月31日,若港元及美元的收益率曲線平行上移100個基點,其他因素不變情況下,當年稅前溢利將會增加港幣39,500,000元(2011年:港幣29,500,000元)。這對儲備的影響輕微。上述利率敏感度分析僅供說明用途。

銀行賬利率風險

下列爲若市場利率變化而對銀 行賬主要貨幣利率風險潛在之 影響,以下分析不包括附屬公 司:

D. Sensitivity analysis to market risk exposure of the Group

The Group is principally exposed to HKD and USD in terms of interest rate risk. At 31 December 2012, if HKD and USD market interest rates had a 100 basis point parallel upward shift of the yield curve in relevant currency with other variables held constant, profit before tax for the year would have been HK\$39,500,000 (2011: HK\$29,500,000) higher by HKD and USD assets liabilities structure. The impact on reserves would be insignificant. The sensitivity analysis set out above is illustrative only.

Interest rate exposures in banking book

The following is a summary of possible effects of market interest rates shocks on the Group's interest rate exposure for major currencies in its banking book. Subsidiaries are excluded from the analysis below:

美元孳息曲線平行上移 100 基點

上述壓力測試僅供說明用途。上述情況說明若市場利率受一些特殊但有可能發生的事件影響而出現極端變化,有關變動對未來 12 個月盈利將會產生的影響。壓力測試採用淨利息收入變化量度對盈利影響。本集團建立的壓力情景,採用了較嚴峻的假設,主要假設包括港元息口與美元息口相關性變化、利率平行移動、在沒有採取緩釋風險情況下所有持倉均計至到期日爲止及同一期檔內利率重新訂價或到期。由於個別產品的潛藏期權風險令產品的風險變得複雜,需以

習性假設以反映實質利率風險

水平。

	Impact on positions at 31 December				
	2012	2011			
Earnings perspective	港幣千元	港幣千元			
Scenarios	HK\$'000	HK\$'000			
Up 100 basis points parallel shift in HK dollar yield curves	53,500	47,000			
Up 100 basis points parallel shift in US dollar yield curves	(14,000)	(17,500)			

The stress tests set out above are illustrative only. The projections illustrate that stressful changes in market interest rates in response to exceptional but plausible events would have adverse effects both on earnings over the next twelve months. The stress tests measure the possible effect of interest rates shock on earnings is assessed by changes in net interest income. To construct stressful scenarios, severe assumptions are made, including a change in the correlation between HK dollar and US dollar interest rates, parallel movement of interest rates for the banking book positions of all repricing or maturity dates. In the absence of actions that would be taken to mitigate the impact of interest rates shock, all positions are assumed to run to maturity and reprice or mature simultaneously within a given time band. As the risk is complicated by having optionality embedded in certain products, behavioural assumptions are made to reflect more accurately the interest rate risk exposures.

4.3 Liquidity Risk

Liquidity risk is the risk that banks fail to provide sufficient funds to grow assets or pay the due obligations, and need to bear an unacceptable loss. The Group follows the sound liquidity risk appetite to provide stable, reliable and adequate sources of cash to meet liquidity needs under normal circumstances or stressed scenarios; and survive with net positive cumulative cash flow in extreme scenarios, without requesting HKMA to act as the lender of last resort.

The Group's liquidity risk management objective is to effectively manage the liquidity of on-balance sheet and off-balance sheet items with reasonable cost based on the liquidity risk appetite to achieve sound operation and sustainable profitability. Customer deposits are the Group's primary source of funds. To ensure stable and sufficient source of funds are in place, the Group actively attracts new deposits, keeps the core deposit and obtains supplementary funding from interbank market. According to different term maturities and the results of funding needs estimated from stressed scenarios, the Group adjusts its asset structure (including loans, bonds investment, interbank placement, etc.) to maintain sufficient liquid assets in support of normal business needs and ensure its ability to raise enough funds at a reasonable cost to serve external claims in case of emergency. The Group is committed to diversify the source of funds and the use of funds to avoid excessive concentration of assets and liabilities and prevent triggering liquidity risk due to the break of funding strand when problem occurred in one concentrated funding source. The Group will establish intragroup liquidity risk management guideline to manage the liquidity funding among different entities within the Group, to restrict their reliance of funding on each other. The Group also pays attention to manage liquidity risk created by off-balance sheet activities, such as loan commitments, derivatives, options and other complex structured products. The Group has overall liquidity risk management strategy to cover the liquidity management of foreign currency assets and liabilities, collaterals, intra-day liquidity, intra-group liquidity, the liquidity risk arising from other risks, etc., and has formulated corresponding funding contingency funding plan.

RC, a standing committee established by the Board of Directors, is the decision making authority of liquidity risk management, and assumes the ultimate responsibility of liquidity risk management. As authorised by RC, ALCO exercises its oversight of liquidity risk and ensures the daily operations of the Group are in accordance with risk appetite and policies as set by RC. Finance Division is responsible for overseeing the Group's liquidity risk. It cooperates with Treasury Division to assist the ALCO to perform liquidity management functions according to their specific responsibilities.

本集團根據香港金管局於 2011 年頒佈之監管政策手冊 LM-2《穩 健的流動資金風險管理系統及管 控措施》中的要求,將會爲現有 的現金流分析及壓力測試當中所 採用的習性模型及假設進行重 檢,以強化本集團於日常及壓力 情景下的現金流分析。在日常情 況下的現金流分析, 本集團將會 對各項應用於表內(如客戶存款) 及表外(如貸款承諾)項目的假 設作出優化。在流動資金風險壓 力測試中,將新增合倂情景,結 合本機構危機及市場危機,並採 用一套更嚴謹的假設,以評估本 集團於更嚴峻的流動資金危機情 況下的抵禦能力。此外,本集團 將會在管理政策內要求本集團維 持緩衝資產組合,當中包括高質 素的有價證券以確保在壓力情況 下的資金需求。應急融資方案闡 述了啓動方案的條件需根據壓力 測試結果和預警指標結果,並詳 述了相關行動計劃及程序和各部 門的職責。

本集團對流動資金風險的管理, 同時適用於新產品或新業務。有 關產品或業務推出前,相關單位 必須首先履行風險評估程序,包 括評估潛在的流動資金風險,並 考慮現行管理措施是否足夠控制 相關風險。如果新產品或新業務 可能對銀行流動資金風險形成重 大影響,須上報風險管理委員會 審批。

4.3 Liquidity Risk (continued)

The Group established liquidity risk management indicators and limits to identify, measure, monitor and control liquidity risk. Such indicators and limits include, but are not limited to liquidity ratio, loan-to-deposit ratio and 1-month mismatch ratio. The Group applies cash flow analysis to assess the Group's liquidity condition under normal conditions and also performs liquidity stress test (including institution specific and world wide crisis) and other methods at least on monthly basis to assess the Group's capability to withstand various severe liquidity crises. Also, Assets and Liabilities Management System is developed to provide data and the preparation for regular arrangement reports to facilitate the liquidity risk management duties.

In accordance with the requirements of Supervisory Policy Manual LM-2 "Sound Systems and controls for Liquidity Risk Management" issued by the HKMA in 2011, the Group has embarked to refine the behavior model and assumptions of existing cash flow analysis and stress test to enhance the Group's cash flow analysis under both normal and stressed conditions. In cash flow analysis under normal circumstances, assumptions applied to on-balance sheet items such as customer deposits and off-balance sheet items such as loan commitments will be modified. In liquidity stress test, a new combined scenario which is a combination of institution specific and world wide crisis will be set up to assess the Group's capability to withstand a more severe liquidity crisis, with a more stringent set of assumptions adopted. In addition, the Group will establish a policy to maintain an asset buffer portfolio which includes high quality marketable securities to ensure funding needs even under stressed scenarios. The contingency funding plan will be established which details the conditions to trigger the plan based on stress test results and early warning indicators, the action plans and relevant procedures and responsibility of various departments.

The Group's liquidity risk management also covers new product or business development. Before launching a new product or business, the relevant departments are required to go through a risk assessment process, which includes the assessment of underlying liquidity risk and consideration of the adequacy of the current risk management mechanism. Any material impact on liquidity risk noted during the risk assessment process will be reported to RC for approval.

4.4 Capital Management

The major objective of the Bank's capital management is to maximise total shareholders' return while maintaining a capital adequacy position in relation to the Bank's overall risk profile. The ALCO periodically reviews the Bank's capital structure and adjusts the capital mix where appropriate to maintain an optimal balance among risk, return and capital adequacy.

The Bank has developed and maintained a sound framework of policies and controls on capital management to support the development of the Bank's business and to meet the statutory capital adequacy ratio. ALCO monitors the Bank's capital adequacy. The Bank has complied with all the statutory capital requirements of the HKMA for the reported periods in respect of banking operation as further elaborated below:

The Bank has adopted the foundation internal ratings-based ("FIRB") approach to calculate the credit risk capital charge for its non-securitisation exposures. A small amount of residual credit exposures was approved by HKMA to be exempted from FIRB approach and remained under standardised (credit risk) ("STC") approach.

Since October 2012, the HKMA has approved the Bank to adopt the internal models ("IMM") approach to calculate general market risk capital charge for foreign exchange and interest rate exposures and exclude our Bank's structural FX positions in the calculation of the market risk capital charge.

The Bank continues to adopt standardised (operational risk) ("STO") approach to calculate the minimum capital requirement for operational risk in year 2012.

In order to implement Basel II Enhancements, the Banking (Capital) (Amendment) Rules 2011 became effective on 1 January 2012. The amendments were mainly to revise the market risk framework and incorporate other enhancements to the Basel II framework. The Bank has calculated the capital charge according to the related regulatory requirements.

4.4 資本管理 (續)

本銀行於 2012 年繼續採用内 部資本充足性評估程序以符 合金管局監管政策手冊「監管 審查程序」內的要求。按金管 局對第二支拄的指引,內部資 本充足評估程序主要用以評 估未能在第一支柱下涵蓋的 重大風險所需的額外資本,從 而設定出本銀行最低普通股 資本充足比率、最低核心資本 充足率及最低資本充足率。本 銀行認爲内部資本充足評估 程序是一個持續的資本管理 過程,並會因應自身的整體風 險狀況而不時檢討及調整其 資本結構。

此外,本銀行每年制定年度資本規劃,由資產負債管理委員會審議後呈董事會批准。資本規劃從業務策略、股東回報、風險取向、信貸評級、監控要求等多維度評估對資本充足性的影響,從而預測未來資本需求及資本來源,以保障本銀行能維持良好的資本充足性及資本組合結構,配合業務發展,保持風險與資本的最佳平衡。

由於計算監管資本所採用的 基準有所改變,以下列示的數 額不應作直接比較。

(a) 資本充足比率

資本充足比率

核心資本比率

資本比率乃根據《銀行業 (資本)規則》及按金管 局就監管規定要求以合併 基準計算本銀行之本地辦 事處及海外分行財務狀況 的比率。

按會計及監管要求所採用 不同之綜合基礎,對其差 異之描述見於財務報表附 註 25。

4.4 Capital Management (continued)

The Bank has continued to adopt an internal capital adequacy assessment process ("ICAAP") to comply with the HKMA's requirements in the Supervisory Policy Manual "Supervisory Review Process" in 2012. Based on the HKMA's guidelines on Pillar II, ICAAP has been initiated to assess the extra capital needed to cover the material risks not captured under Pillar I, and therefore minimum common equity CAR, minimum core CAR and the minimum CAR are determined. The Bank considers this ICAAP process as an on-going process for capital management and periodically reviews and adjusts its capital structure in relation to the overall risk profile.

In addition, the capital plan of the Bank is drawn up annually and then submitted to the Board for approval after endorsement of the ALCO. The plan is built up by assessing the implications of various factors upon capital adequacy such as the business strategies, return on equity, risk appetite, credit rating, as well as regulatory requirements. Hence, the future capital requirement is determined and capital sources are identified also. The plan is to ensure the Bank's capital adequacy and achieve optimal capital structure in order to align with its business development needs and risk profile.

As a result of the change in the bases of regulatory capital calculation, the amounts shown below are not directly comparable.

(a) Capital adequacy ratio

	2012	2011
Capital adequacy ratio	20.43%	19.36%
Core capital ratio	19.71%	18.80%

The capital ratios are computed on the combined basis that comprises the positions of the Bank's local offices and overseas branches specified by the HKMA for its regulatory purposes and in accordance with the Banking (Capital) Rules.

The differences between the basis of consolidation for accounting and regulatory purposes are described in Note 25.

以公平值計量的金融工具分爲以 下三個層級:

- 第一層次:相同資產或負債在 活躍市場中的報價(未經調整),包括部分政府發行債務 工具及若干外匯衍生合約。
- 第二層次:估值技術爲直接或 間接的使用除第一層級中的 資產或負債的市場報價以外 的其他可觀察參數,此層級包 括大部分場外交易的衍生合 約及從價格提供商獲取價格 的債券。
- 第三層次:估值技術爲使用了 任何非基於可觀察市場數據 的參數(不可觀察參數),此 層級包括有重大不可觀察因 素的股份投資及債務工具。

當無法從公開市場獲取報價時,本集團通過一些估值技術或經紀/交易商之詢價來確定金融工具的公平值。

對於本集團所持有的金融工具, 其估值技術使用的主要參數包括 債券價格、利率、匯率、權益及 股票價格、波動水平及交易對手 信用差價等,均爲可觀察到的且 可從公開市場獲取的參數。 The Group has an established governance structure and controls framework to ensure that fair values are either determined or validated by control units independent of the front offices. Control units have overall responsibility for independent verification of results from Treasury Division and all other significant fair value measurements. Specific controls include verification of observable pricing inputs; review and approval for new models and changes to models; calibration and back testing of models against observed market transactions; analysis and investigation of significant daily valuation movements; review of significant unobservable inputs and valuation adjustments. Significant valuation issues are reported to senior management, RC and AC.

Financial instruments measured at fair value are classified into the following three levels:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities, including debt instruments issued by certain government and certain foreign exchange derivative contracts.
- Level 2: Valuation technique using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. This level includes the majority of the OTC derivative contracts and debt securities with quote from pricing services providers.
- Level 3: Valuation technique using inputs for the asset or liability that is not based on observable market data (unobservable inputs). This level includes equity investment and debt instruments with significant unobservable components.

The Group use valuation techniques or broker/dealer quotations to determine the fair value of financial instruments when unable to obtain the open market quotation in active markets.

The main parameters used in valuation techniques for financial instruments held by the Group include bond prices, interest rates, foreign exchange rates, equity and stock prices, counterparty credit spreads and others, which are all observable and obtainable from open market.

本集團之衍生金融工具合約/名義合約 數額及其公平值詳列於下表。資產負債 表日各類型金融工具的合約/名義合約 數額僅顯示了於資產負債表日之未完成 交易量,而若干金融工具之合約/名義 合約數額則提供了一個與綜合資產負債 表內所確認的公平値資產或負債的對比 基礎。但是,這並不代表所涉及的未來 的現金流量或當前的公平值,因而也不 能反映本集團所面臨的信貸風險或市場 風險。隨著與衍生金融工具合約條款相 關的匯率、市場利率、貴金屬價格或股 份權益價格的波動,衍生金融工具的估 值可能產生對銀行有利(資產)或不利 (負債)的影響,這些影響可能在不同 期間有較大的波動。

(a) 衍生金融工具

21. Derivative financial instruments and hedge accounting

The Group enters into the following exchange rate, interest rate, commodity and equity related derivative financial instrument contracts for trading and risk management purposes:

Currency forwards represent commitments to purchase and sell foreign currency on a future date.

Currency and interest rate swaps are commitments to exchange one set of cash flows for another. Swaps result in an exchange of currencies or interest rates (for example, fixed rate for floating rate) or a combination of all these. Except for certain currency swap contracts, no exchange of principal takes place.

Foreign currency and equity options are contractual agreements under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of the financial instrument at a predetermined price. In consideration for the assumption of foreign exchange and interest rate risk, the seller receives a premium from the purchaser. Options are negotiated over-the-counter ("OTC") between the Group and its counterparty or traded through the stock exchange (for example, exchange-traded stock option).

The contract/notional amounts and fair values of derivative financial instruments held by the Group are set out in the following tables. The contract/notional amounts of these instruments indicate the volume of transactions outstanding at the balance sheet dates and certain of them provide a basis for comparison with fair value instruments recognised on the consolidated balance sheet. However, they do not necessarily indicate the amounts of future cash flows involved or the current fair values of the instruments and, therefore, do not indicate the Group's exposure to credit or market risks. The derivative financial instruments become favourable (assets) or unfavourable (liabilities) as a result of fluctuations in foreign exchange rates, market interest rates, metal prices or equity prices relative to their terms. The aggregate fair values of derivative financial instruments assets and liabilities can fluctuate significantly from time to time.

(a) Derivative financial instruments

The Group trades derivative products (both exchange-traded or OTC) mainly for customer business. The Group strictly follows risk management policies in providing derivative products to our customers and in trading of derivative products in the interbank market.

Derivatives are also used to manage the interest rate risk of the banking book. A derivative instrument must be included in the approved product list before any transactions for that instrument can be made. There are limits to control the notional amount of exposure arising from derivative transactions, and the maximum tenor of the deal is set. Every derivative transaction must be input into the relevant system for settlement, mark to market revaluation, reporting and control.

40. 分類報告

(a) 按業務劃分

本集團業務共分爲三個業務分類,它們分別是個人銀行業務、企業銀行業務和財資業務。業務線的分類是基於不同客戶層及產品種類。

個人銀行和企業銀行業務線均會 提供全面的銀行服務,包括各類存 款、透支、貸款、與貿易相關的產 品及其他信貸服務、投資及保險產 品、外幣業務及衍生產品等;個人 銀行業務線主要是服務個人客 戶,而企業銀行業務線主要是服務 公司客戶。至於財資業務線,除了 自營賈賣外,還負責管理集團的流 動資金、利率和外匯敞口。「其他」 這一欄,主要包括本集團持有房地 產、投資物業及股權投資等。

本集團的主要收入來源爲利息收入,並且高層管理人員主要以 淨利息收入來評估各業務分類的業績,因此所有業務分類的利息收入及支出以淨額列示。

業務線的資產、負債、收入、支出、經營成果及資本性支出是基於集團會計準則進行計量,分類資料包括直接屬於該業務線的績效及可以合理攤分至該業務線的績效。跨業務線的資金定價,按集團內部資金轉移價格機制釐定,主要是以市場利率爲基準,並考慮有關產品的特性。

40. Segmental reporting

(a) Operating segments information

The Group divides its businesses into three operating segments. They are Personal Banking, Corporate Banking and Treasury. The classification of the Group's operating segments is based on customer segment and product type.

Both Personal Banking and Corporate Banking provide general banking services including various deposit, overdrafts, loans, trade related products and other credit facilities, investment and insurance products, and foreign currency and derivative products, etc. Personal Banking mainly serves retail customers while Corporate Banking mainly deals with corporate customers. Treasury manages the funding and liquidity, and the interest rate and foreign exchange positions of the Group in addition to proprietary trades. "Others" mainly represents the Group's holdings of premises, investment properties and equity investments.

As the Group's major revenue is derived from interest and the senior management relies primarily on net interest income to assess the performance of the segment, interest income and expense for all reportable segments are presented on a net basis.

Measurement of segment assets, liabilities, income, expenses, results and capital expenditure is based on the Group's accounting policies. The segment information includes items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Inter-segment funding is charged according to the internal funds transfer pricing mechanism of the Group, which is primarily based on market rates with the consideration of specific features of the product.

The information on cross-border claims discloses exposures to foreign counterparties on which the ultimate risk lies, and is derived according to the location of the counterparties after taking into account any transfer of risk. In general, such transfer of risk takes place if the claims are guaranteed by a party in a country, which is different from that of the counterparty, or if the claims are on an overseas branch of a bank whose head office is located in another country. Only regions constituting 10% or more of the aggregate cross-border claims are analysed by geographical areas and disclosed as follows:

3.1 内部評級系統及風險組成部分(續)

(A) 內部評級系統結構及內部評級與外部評 級對應關係

本銀行使用的內部評級系統是一個兩維 評級系統,分別提供借款人及交易特性 的評估。於企業和銀行組合中,債務人 評級維度反映借款人的違約風險,授信 評級維度反映債務人一旦違約時影響損 失嚴重程度的特定交易因素。

中銀香港在集團層面開發了統計模型以自行估算企業、銀行和零售債務人的違約概率(PD),以及使用零售內部評級基準計算法下零售風險承擔的違約損失率(LGD)和違約風險承擔(EAD)。

本銀行使用內部評級系統評估所有內部 評級基準計算法下借款人的違約可能 性。違約概率對借款人一年期跨度內的 違約風險做出估算。借款人信貸評級反 映在特定的具體評級標準下對某些信貸 能力相似的借款人的分類,從而推算出 違約概率中值以計算風險加權資產。

在確定債務人評級的過程中,會對每個 債務人最新的財務表現的變化、管理層 質素、行業風險和關聯集團進行評估, 並據此作爲關鍵因素以預測在不同經濟 條件下履行其財務承諾的能力和意願。

企業和銀行債務人及零售違約概率組別 分爲8個債務人評級,包括7個非違約債 務人級別且細分至26個信貸級別和1個 違約級別。而根據金管局指引規定,使 用監管分類準則計算法的項目融資風險 承擔,分爲4個非違約級別和1個違約級 別。對於零售內部評級基準計算法組合 的估算之分組按債務人性質、授信類 型、抵押品種類和逾期狀況分爲不同違 約概率、違約風險承擔和違約損失率組 別。分組過程爲個人住宅按揭貸款和空 殼公司住宅按揭貸款、合資格循環零售 風險承擔、其他個人零售風險承擔和零 售小企業風險承擔的違約概率、違約損 失率和違約風險承擔準確及一致的估算 奠定了基礎。根據金管局指引規定,所 有企業和銀行的信貸交易都具有授信評 級(按照違約損失率程度)。違約損失率 與違約概率相乘產出預期損失 (EL), 對信貸風險進行量化評估。

3. Credit risk under the internal ratings-based approach (continued)

3.1 The internal ratings systems and risk components (continued)

(A) The structure of internal rating systems and the relationship between internal ratings and external ratings

The Bank's internal rating system is a two dimensional rating system that provides separate assessment of borrower and transaction characteristics. For corporate and bank portfolios, the obligor rating dimension reflects exclusively the risk of borrower default and the facility rating dimension reflects transaction specific factors that affect the loss severity in the case of borrower default.

BOCHK developed statistical models in group level to provide own estimated probability of default ("PD") for its corporate, bank and all retail borrowers, and loss given default ("LGD") and exposure at default ("EAD") for retail exposures under Retail IRB Approach.

The Bank uses internal rating system to assess the borrower's likelihood of default for all IRB portfolios. PD estimates the risk of borrower default over a one-year period. A borrower credit grade means a grouping of similar credit-worthiness to which borrowers are assigned on the basis of specified and distinct set of rating criteria, from which the mid-point PD are derived for RWA calculation.

In the process of obligor rating assignment, variables of latest financial performance, management quality, industry risks and group connection of each obligor are assessed as critical factors to predict borrower's ability and willingness to meet with the contractual obligations under different economic conditions.

The borrowers for corporate and bank, and retail PD pools are assigned into eight broad obligor ratings including seven grades for non-defaulted obligors with sub-divisions into 26 minor credit grades and one for defaulted obligors. In the supervisory slotting criteria approach for the project finance exposures, there are four grades for non-defaulted borrowers and one for defaulted borrowers in accordance with the HKMA guidance. The estimates for retail IRB portfolios are pooled by nature of obligors, facility types, collateral types and delinquency status into PD, EAD and LGD pools. This pooling process provides the basis of accurate and consistent estimation for PD, LGD and EAD at the pool level for exposures arising from residential mortgages to both individuals and property-holding shell companies, qualifying revolving retail exposures and other retail exposures to individuals and small business retail exposures. All credit transactions for corporates and banks are assigned facility ratings (in terms of LGD) in accordance with the HKMA guidance. LGD estimates multiplied by the PD estimates produce the expected loss (EL) estimates, which are used to assess credit risk quantitatively.

3. 内部評級基準計算法下的信貸風險 (續)

3.1 内部評級系統及風險組成部分(續)

(B) 内部估算值的用途

本銀行繼續使用違約概率估算值於計算企業及銀行風險承擔的監管資本。此外,為加強內部評級估算值的應用,2011年本銀行採用中銀香港以集團層面進一步開發估算官方實體風險承擔的違約概率模型。由2012年起,每個企業、銀行及官方實體的風險承擔由其單獨的違約損失率及違約風險承擔估算,並主要考慮了授信類型、抵押品種類。內部評級系統所產生的風險組成部分估計結果,已應用於信貸審批、信貸監控、信貸風險報告及分析等。

(C) 信貸風險緩釋工具之管理及確認程序

對於資本管理項下認可的抵押品,本銀行在抵押品評估和管理上已制定明確的 政策和程序,並符合《銀行業(資本) 規則》對信貸風險緩釋認可抵押品的操 作要求。

對於採用基礎內部評級基準計算法,計算資本的信貸風險承擔,其信貸風險緩釋工具中的認可擔保包括由風險權重比交易對手低的銀行以及證券公司,或具有內部評級且評級相當於外部信用評級A-或以上的企業所提供的擔保。本銀行通過確定淨信貸風險承擔和有效的違約損失率,考慮認可抵押品的信貸風險緩釋作用。

對於零售內部評級基準計算法計算的信貸風險承擔,信貸風險緩釋的作用按擔保和抵押品性質包含在違約概率或違約損失率的內部風險參數之中。

本銀行所用信貸風險緩釋手段(作資本計算用的認可抵押品和認可擔保)的信貸風險集中性和市場風險集中性處於低水平。

截至報告日,在計算資本時,本銀行並 無使用任何認可信貸衍生工具合約或表 內、表外認可淨額作爲信貸風險緩釋工 具。

Credit risk under the internal ratings-based approach (continued)

3.1 The internal rating systems and risk components (continued)

(B) Use of internal estimates

Besides using PD estimates for regulatory capital calculation in corporate and bank exposures, the Bank adopted BOCHK's further developed PD estimates for the sovereign exposures, together with the LGD and EAD estimates for corporate, bank and sovereign exposures developed in 2011 for the purpose of enhancing the use of internal rating estimates. From 2012 onwards, each of corporate, bank, and sovereign exposures is estimated by individual LGD and EAD based on the nature of the facility types, collateral types. The estimates of risk components derived from internal rating systems have been used in credit approval, credit monitoring, reporting and analysis of credit risk information, etc.

(C) Process of managing and recognising credit risk mitigation

For those collaterals recognised under capital management, the Bank has well-defined policies and procedures for collateral valuation and management which are compliant with the operational requirements for recognised collateral of credit risk mitigation as stated in the Banking (Capital) Rules.

For the credit exposures adopting FIRB approach for capital calculation purpose, the recognised eligible guarantees include the guarantees provided by banks and securities firms with a lower risk weights than the counterparty; and corporates with internal credit ratings which are equivalent to external credit rating A- or above. The Bank takes into account the credit risk mitigation effect of recognised collaterals through its determination of the net credit exposures and the effective LGD.

For retail IRB approach, the effect of the credit risk mitigation is incorporated into the internal risk parameters of PD or LGD depending on the nature of the guarantees and collaterals for calculating the risk exposures.

The credit and market risk concentrations within the credit risk mitigation (recognised collateral and guarantees for capital calculation) used by the Bank are under a low level.

Up to the date of report, for capital calculation, the Bank has not used any recognised credit derivative contracts, on- or off-balance sheet recognised netting for credit risk mitigation yet.

(D) 内部評級系統控制機制

(D) The control mechanisms used for rating systems

本銀行已建立了一套完善的控制機制,以確保評級系統包括在日常業務流程使用 風險組成部分以評估信貸風險的完整 性、準確性和一致性。所有內部評級基準 計算法的風險計量模型均由風險管理委 員會批准。 The Bank has established a comprehensive control mechanism to ensure the integrity, accuracy and consistency of the rating systems including the processes for using the risk components in the day-to-day business to assess credit risk. All of IRB risk models are approved by the Risk Committee ("RC").

爲使風險評級結果達到合理、準確的程度,本銀行建立了獨立於營銷和市場推廣單位的評級審批程序。由於內部評級是信貸決策的重要因素,實施監控機制以確保評級的完整性、準確性和一致性。對於批發類(企業及銀行)信貸組合,內部評級結果通常由獨立於營銷和市場推廣的信貸審核人員負責審批。

In order to achieve reasonably accurate risk ratings assignment, the Bank has established a rating approval process which is independent of the sales and marketing units. Since internal rating is one of the key inputs to credit decision making, a control mechanism is put in place to ensure the integrity, accuracy and consistency of the rating assignment. For the wholesale (corporate and bank) portfolio, internal ratings are normally approved by credit officers who are functionally separated from the sales and marketing units.

零售組合的評級確定和風險量化過程高 度自動化。作為日常信貸評估過程的組成 部分,自動評級所需輸入數據的準確性和 完整性由獨立於業務拓展功能的單位負 責核實。 The rating assignment and risk quantification process of retail portfolio are highly automated. As an integral part of the daily credit assessment process, the accuracy and completeness of data input for automatic rating assignment are verified by units independent from business development function.

根據本銀行信貸風險政策,債務人評級至 少每年進行重檢。在債務人發生信貸事件 的情况下,根據本銀行信貸風險政策,須 立即進行評級重檢。 The obligor rating assignment is reviewed at least annually as required by the Bank's credit risk policy. When credit events occur to the obligor, rating review is triggered promptly in accordance with the Group's credit risk policy.

本銀行設計了評級推翻程序,允許信貸分析員考慮評級過程中未能包括的其他相關信息,但從保守及謹慎借貸原則出發,通過評級推翻程序調低債務人評級的幅度不設下限,但債務人評級的調升幅度則有限制,幅度最多不超過2個子級別,且調升理據須限制在事先確定的適當理由清單之內。所有推翻評級需由更高一級的信貸審批授權人簽認。內部評級政策設定評級推翻觸動點爲10%。評級推翻的運用和推翻原因的分析作爲內部評級模型表現檢查的一部分。

Rating override is designed to allow the credit analyst to include any other relevant credit information that has not yet been captured in the rating process. For reasons of conservatism and prudential considerations, overrides are unlimited in terms of downgrades but more restricted for better grades (upgrades). All upgrades will be limited to a maximum of two sub-grades supported by a very narrowly pre-defined list of appropriate reasons. All overrides need to be signed off by a higher level of credit approval authority. The internal rating policy sets a trigger point of 10% overrides on rating cases. The use of overrides and override reasons are analysed as part of performance review on IRB rating models.

3. Credit risk under the internal ratings-based approach (continued)

3.7 實際損失及估算値的分析 (續)

爲符合相關的法規和會計準則,預期損失和實際損失的量度和計算採用不同的方法,因此不能直接相比較。其差異主要來自於對「損失」的定義的基本差異。預期損失在巴塞爾資本協定二是測算債務人違約的潛在經濟損失並考慮金錢時間値及包括一旦債務人違約時與回收信貸風險承擔相關的直接及間接成本,而實際損失是指於年度內根據會計準則按個別評估計算的減值準備淨撥備及核銷。

實際違約概率(實際 PD)的量度是使用違約的債務人數目(批發風險承擔)或賬戶數目(零售風險承擔),而估算的違約概率(估計 PD)是一個經濟週期的長期平均違約率的估算,並從評級日預計一年期內的違約概率。

因此,由於經濟情況圍繞週期性平均水平而上下波動,某年的(「特定時點」) 實際違約率通常會不同於貫穿週期的估算違約概率。

各資產組合的估算違約概率是較實際 違約率保守。

3.7 Analysis of actual loss and estimates (continued)

It should be noted that expected loss and actual loss are measured and calculated using different methodologies compliant to relevant regulatory and accounting standards, which are therefore not directly comparable. The limitation arises mainly from the fundamental differences in the definition of "loss". The expected loss under Basel II which estimates the economic loss arising from the potential default of the obligor by taking into account the time value of money and including the direct and indirect costs associated with the recoveries on the credit exposures, while actual loss is the net individually assessed impairment charges and write-offs made during the year in accordance with the accounting standards.

The actual default rate (actual PD) is measured by using the number of obligors (for wholesale exposures) or number of accounts (for retail exposures) defaulted whereas the estimated probability of default (estimated PD) is an estimate of the long run average default rate over an economic cycle and is the estimated one-year forward-looking PD from the date of rating assignment.

Hence, actual PD in a particular year ("point-in-time") will typically differ from the estimated PD which is the "through-the-cycle" estimates as economies move above or below cyclical norms.

The estimated PD is more conservative than the actual default rate for all asset classes.

4. 標準(信貸風險)計算法下的信貸 風險

4.1 外部信貸評估機構 (ECAI) 評級的使

本銀行持續沿用標準(信貸風險)計算 法並以外部信用評級爲依據確定以下 資產承擔的信貸風險權重:

- 官方實體
- 公營單位
- 多邊發展銀行

本銀行按《銀行業(資本)規則》第4 部分規定的對應標準,使用外部信貸評 估機構發行人評級的對應銀行賬的風 險承擔。本銀行認可的外部信用評估機 構包括標準普爾、穆迪和惠譽。

4.2 信貸風險緩釋

對於採用標準(信貸風險)計算法的信貸風險承擔,非逾期風險承擔的主要認可抵押品類型包括現金存款、債券及股票。此外,房地產可作爲逾期風險承擔的認可抵押品。本銀行認可押品符合《銀行業(資本)規則》中綜合法計算風險緩釋效應的要求。對於標準(信貸風險)計算法下的計算信貸風險承擔資本要求時,認可擔保人包括由風險權重比交易對手低的官方實體、公營單位以及多邊發展銀行以及外部評級爲 A-或以上的企業。

4. Credit risk under the standardised (credit risk) approach

4.1 Ratings from External Credit Assessment Institutions ("ECAI")

The Bank continues to adopt standardised (credit risk) ("STC") approach based on external rating to determine the risk weight of the following classes of exposures:

- Sovereign
- Public sector entity
- Multilateral development bank

The Bank performs the ECAI issuer ratings mapping to its exposures in banking book in accordance with Part 4 of the Banking (Capital) Rules. The ECAIs recognised by the Bank include Standard & Poor's, Moody's and Fitch.

4.2 Credit risk mitigation

For credit exposures adopting STC approach, the main types of recognised collaterals include cash deposits, debt securities and shares for non past-due exposures. In addition, real estate collateral is also recognised for past due exposures. The treatment of recognised collateral is compliant with the comprehensive approach for credit risk mitigation as mentioned in the Banking (Capital) Rules. For credit exposures under STC approach, the recognised guarantees for capital calculation includes the guarantee given by sovereigns, public sector entities, multilateral development banks with a lower risk weight than the counterparty, and corporate with external rating of A- or above.

5. 交易對手信貸風險相關承擔

本銀行在自營賬及銀行賬下來自場外衍生工具交易、回購形式交易之交易對手信貸風險的風險管理架構,與本年報中財務報表附註 4.4 所述一致。本銀行通過一般信貸批核程序核定每一交易對手之風險承擔額度以控制場外衍生工具結算前風險,及結算額度以控制在自營賬及銀行賬下與外匯交收有關的結算風險。本銀行採用每日盯市之現行風險承擔及潛在風險承擔方法監察。風險及信貸監理處密切和及時地識別與監控任何例外及超額情況。

目前,本銀行採用現行風險承擔方法計量和 監控交易對手信貸風險承擔。交易對手信貸 風險承擔由現行風險承擔和潛在風險承擔 組成。

本銀行已爲債券回購形式交易下之抵押債券,制定審慎的認可準則及抵押折扣率。

本銀行根據交易對手的違約可能性及逾期時間制定了授信資產分類政策。若有客觀證據證明一項資產減值損失已出現,將根據香港財務報告準則及監管要求進行資產減值準備。

5. Counterparty credit risk-related exposures

The Bank's counterparty credit risk arising from over-the-counter ("OTC") derivative transactions, repo-style transactions both in trading and banking book is subject to the same risk management framework as mentioned in Note 4.4 to the Financial Statements in this Annual Report. The Bank establishes credit limit through formal credit approval procedures to control the pre-settlement credit risk arising from OTC derivatives transactions and settlement limit to control the settlement risk arising from foreign exchange-related transactions in both the trading book and banking book. The Bank monitors the risk exposure due to fluctuations in the market by using the current exposure and the potential exposure value of the transactions. Exceptions or excesses are timely and closely identified and monitored by CMD.

Currently, the Bank uses the Current Exposure Method to measure and monitor the counterparty credit exposures, which comprises current exposures and potential future exposures.

The Bank establishes prudent eligibility criteria and haircut policy of debt securities being pledged as collateral for repo-style transactions.

The Bank formulates policy for classification of credit assets according to the PD of individual counterparty and the period of overdue. If there is objective evidence that an impairment loss has been incurred, impairment allowance will be provided according to HKFRS and regulatory requirements.

8. 銀行賬的股權風險承擔

8. Equity exposures in banking book

持有其他企業的股權乃是根據獲取該等股權的初始意圖入賬。因關係及策略性理由而持有的股權與因其他理由(包括資本增值)而持有的股權將以不同的分類入賬。擬持續持有的股權投資(不包括對聯營公司、共同控制企業或附屬公司的投資)歸類爲可供出售證券,並於資產負債表內的「證券投資」列示。

本銀行採用與詳列於財務報表附註 2.8(4) 和 2.11 相同之會計處理及估 值方法處理銀行賬中除聯營公司、共同 控制企業或附屬公司以外的股權投 資。若其後增加對有關股權的投資,並 引致一項股權投資成爲聯營公司、共同 控制企業或附屬公司,該項投資將會根 據本銀行的會計政策重新分類入賬。 Equity holdings in other entities are accounted for in accordance with the underlying intentions of holdings at the inception of acquisition. The classifications for equity holdings taken for relationship and strategic purposes will be separated from those taken for other purposes (including capital appreciation). Investments in equity shares which are intended to be held on a continuing basis, but which do not comprise investments in associates, jointly controlled entities or subsidiaries, are classified as available-for-sale securities and are reported in the balance sheet as "investments in securities".

For equity exposures in banking book other than associates, jointly controlled entities or subsidiaries, the Bank applies the same accounting treatment and valuation methodologies as detailed in the notes 2.8(4) and 2.11 to the financial statements. If additional investment is made subsequently such that an investee becomes an associate, jointly controlled entity or subsidiary, then the investment is reclassified in accordance with the Bank's accounting policies.
