Investment Strategy, Philosophy in Deciding Crediting Interest Rates and Historical Crediting Interest Rates:

The assets supporting the policies under the plan mainly consist of fixed income instruments or interest-bearing securities (including but not limited to government and corporate bonds, etc.).

- BOC Life primarily invests in investment-grade bonds, together with a small portion of high-yield bonds and emerging-market bonds to further improve yield.
- Under normal circumstances, the major markets invested by BOC Life are North America, the Chinese mainland, Hong Kong China and other Asian developed countries.

With the aim of achieving our long term investment target, BOC Life, at our sole discretion, reserves the right to adjust the aforementioned asset allocation when there are material changes in market outlook and condition, or engage in other financial arrangements including but not limited to reinsurance arrangement. BOC Life aims at investing in assets denominated in policy's currency. If the currency by which the assets are denominated is not the same as policy currency, BOC Life may use derivatives to manage the impact of currency risk.

For the latest Investment Strategy, please refer to BOC Life website www.boclif.com.hk.

Crediting Interest Rate of Universal Life Policies:

For universal life insurance business, the asset portfolio is constructed to support the crediting interest rate for the policy. It also allows Policy Owners to receive a share of profits attributable to the universal life insurance business of our company by means of crediting of interest. To accomplish the purpose, we invest in a wide range of asset portfolios that are prudently chosen by BOC Life to balance the risk. In general, the asset portfolios mainly consist of fixed income investment securities and equity investments.

The actual crediting interest rate is determined by the stipulated approach in BOC Life' s policy, which is based on a number of factors, including but not limited to, market conditions, actual investment return in the past and long-term expectation of investment return in the future. Future crediting interest rate may vary from time to time over the policy term, but will not be less than the minimum crediting interest rate as specified in the policy provisions, endorsements and/ or amendments. The actual crediting interest rate is recommended by our Appointed Actuary according to the aforementioned BOC Life' s policy and approved by the Board of Directors of BOC Life.

In light of the above factors, crediting interest rate is not guaranteed and may be higher or lower than the values illustrated in the benefit illustration provided at point of sale.

You may browse the following website, www.boclif.com.hk/ps, to understand BOC Life' s crediting interest rate history for reference purposes. Please be reminded that the crediting interest rates shown on the website are before the deduction of any relevant policy charges (e.g. Premium Charge, Cost of Insurance, Policy Fee, etc). Please note that past performance of crediting interest rate is not an indicator for its future performance.

Risk Disclosure of RMB and USD Insurance:

RMB and USD policies are subject to exchange rate risk. The exchange rate between RMB and HKD or USD and HKD may rise as well as fall. Therefore, if calculated in HKD, premiums, fees and charges (where applicable), account value / surrender value and other benefits payable under RMB or USD policy will vary with the exchange rate. The exchange rate between RMB and HKD or USD and HKD will be the market-based prevailing exchange rate determined by BOC Life from time to time, which may not be the same as the spot rate of banks. The fluctuation in exchange rate may result in losses if a customer chooses to pay premiums in HKD, or requests the insurer to pay the account value / surrender value or other benefits payable in HKD, for RMB or USD policy. **RMB Conversion Limitation Risk** - RMB Insurance are subject to exchange rate fluctuations which may provide both opportunities and risks. The fluctuation in the exchange rate of RMB may result in losses in the event that the customer converts RMB into HKD or other foreign currencies. (Only applicable to Individual Customers) RMB is currently not fully freely convertible.

Individual customers can be offered CNH rate to conduct conversion of RMB through bank accounts and may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance. (Only applicable to Corporate Customers) RMB is currently not fully freely convertible. Corporate customers that intend to conduct conversion of RMB through banks may occasionally not be able to do so fully or immediately, for which it is subject to the RMB position of the banks and their commercial decisions at that moment. Customers should consider and understand the possible impact on their liquidity of RMB funds in advance.

Other Key Risks:

- The premium payable of the Plan and/or the Rider (if any) at the time of application and renewal, and fees and charges while the policy is in force are calculated based on the following factors (if applicable), including but not limited to the Sum Insured, gender, issue age, attained age, smoking habit, premium payment term, underwriting class, risk class and residency and is not guaranteed. Unless otherwise stated in the policy documents, some fees and charges, including Premium Charges, Policy Fee, and Cost of Insurance (if applicable), are not guaranteed. BOC Life has the discretion to adjust such fees and charges from time to time. BOC Life reserves the right to review and adjust the premium payable, fees and charges at any time. Factors leading to such adjustment include but not limited to emergence of difference between actual experience and current expectation.
- The Policy Owner should pay premium on time during the premium payment term. It may result in lapse or termination of the policy if the required amount (such as premium) is not made before expiry of the grace period (if applicable) as prescribed by BOC Life. If the policy is terminated or lapsed due to non-payment of premium, the surrender value received by the Policy Owner may be less than the total premiums paid and the Policy Owner will lose the insurance protection provided by the policy.
- BOC Life may terminate the policy before the maturity date if any one of the following events occurs:
 - (i) the death of the Insured; or
 - (ii) BOC Life approves the Policy Owner's written request for surrender; or
 - (iii) the Policy Owner fails to pay the required amount by BOC Life before expiry of the grace period; or
 - (iv) payment of the Terminal Illness Benefit (if applicable) by BOC Life.
- The actual rate of inflation may be higher than expected, therefore the amount you receive may be less in real terms.
- The policy may lapse when the account value falls to zero or negative.

Accumulation interest rates per annum of the Premium Deposit Account for RMB, HKD and USD policies are not the same. iv) In the event of the Insured's death, any Premium Deposit Account balance (if any) together with the Death Benefit will be payable to the policy Beneficiary. v) Partial Withdrawal from Premium Deposit Account is not allowed. vi) In the event of surrender of the policy, a Premium Deposit Withdrawal Fee will be deducted from the amount withdrawn from the Premium Deposit Account balance (if any). BOC Life may change this Premium Deposit Withdrawal Fee from time to time. vii) For details, please refer to the policy documents and provisions issued by BOC Life.
5. If the Target Premium payable for the 2nd policy year is not fully paid before the end of the grace period (31 days from the due date of payment of the Target Premium for the 2nd policy year or such other period as determined by BOC Life from time to time), the policy will be terminated immediately and deemed surrender of the policy. BOC Life will calculate the Surrender Charge⁷ based on the first year Surrender Charge⁷ rate.
6. Net Premium Paid means all premiums received by BOC Life in respect of the Plan (excluding any prepaid premiums which are not yet debited for payment of the Target Premium for the 2nd policy year) less any Partial Withdrawal amount (including any withdrawal charge applicable) (if any).
7. Surrender Charge is charged based on Account Value and applicable rate upon surrender. Upon surrender, if there is no Partial Withdrawal being made within the policy year of surrender, the first 20% of the Account Value is waived from Surrender Charge. For relevant Surrender Charge and other details, please refer to insurance proposals and policy documents and provisions issued by BOC Life.
