Upgraded "Scameter+" mobile application

To fight against the telecommunication and online fraud, the Hong Kong Police Force has rolled out the upgraded version "Scameter+" mobile application to help the public identify frauds and online pitfalls. The upgraded "Scameter+" mobile application features the following three new functions:

1) Call Alert
2) Website Detection
3) Public Intelligence

When customers encounter suspicious calls, online sellers, friend requests, job advertisements, investment websites, and the like, they can enter the platform account name or number, payment account, phone number, email address, URL, etc. to assess the risk of fraud and cyber security.

Please refer to the following website hyperlinks for the upgraded "Scameter+" information:-
