Risk Disclosure Statement:

The following Risk Disclosure Statement may not disclose all the risks involved. You should undertake your own research and study before you trade or invest. You should carefully consider whether trading or investment is suitable in light of your own financial position, investment experiences and objectives.

Key Risks:

- **Interest rate risk:** The silver bonds carry a floating rate of interest that is calculated other than by reference to prevailing Hong Kong dollar interest rates. The return on your silver bonds may be relatively lower if the prevailing Hong Kong dollar interest rates increase during the term of the silver bonds.
- **Index risk:** The silver bonds carry a rate of interest that includes a component linked to the Composite Consumer Price Index. The return on your silver bonds may be affected by movements in the index.
- **Liquidity risk:** You cannot transfer your silver bonds to any other person. There will be no secondary market for your silver bonds. If you wish to sell your silver bonds to any other person before maturity, you may only submit an early redemption request to your placing bank or designated securities broker.
- **Credit risk:** The silver bonds are not secured. When you buy silver bonds you will be relying on the creditworthiness of HKSAR Government. Adverse changes in the wider economic conditions in Hong Kong and the world and/or the creditworthiness of HKSAR Government may affect HKSAR Government's ability to make payments of principal of and interest on your silver bonds. In the worst case scenario, you could lose all of your investment.
- **Intermediary risk:** You can only hold silver bonds indirectly through certain institutions, whom you will have to rely on to perform a number of functions, including passing on payments of principal of and interest on your silver bonds to you and proving your interest in your silver bonds.
- **Infrastructure investment risk:** The silver bonds may not necessarily be a suitable investment if you seek exposure to specific types of infrastructure projects. While the proceeds of the silver bonds will be used to fund one or more of the "Eligible Project" as defined in the Infrastructure Bond Framework, payments under the silver bonds are not linked to the performance of the relevant Eligible Project(s). The silver bonds are not secured by income from the Eligible Project(s) and you do not have any rights to the Eligible Project(s). HKSAR Government has the sole and absolute discretion to determine the allocation of the proceeds of silver bonds to the Eligible Project(s), which may be changed and/or updated from time to time.

An investment in the Bonds is not equivalent to a time deposit and involves investment risks. You must read and understand the sections entitled "Important Investment Considerations" of Issue Circular before deciding whether to invest in the Bonds.

Investing in Bonds involves risk. You must read and understand the Issue Circular (including "Important Investment Considerations") and Programme Circular dated 21 August 2026 before deciding whether to invest in the Bonds. If you have any inquiries on the Issue Circular and Programme Circular, you should seek advice from independent financial adviser.

Risk of bonds trading

The return on bonds of deposit is linked to the credit of the Issuer and Guarantor (if applicable). The credit ratings assigned by credit rating agencies do not guarantee the creditworthiness of the Issuer and Guarantor, as applicable. In the event that the Issuer defaults, it is possible that you may lose all your investment, including the principal. The prices of bonds/certificates of deposit may go up and down and may be volatile. The bonds/certificates of deposit may even become worthless. Buying and selling bonds/certificates of deposit may not necessarily result in any profit, and may sometimes result in loss.

Regarding to the risk details of the bonds, you can visit the HKSAR Government Bonds website at https://www.hkgb.gov.hk/en/infrastructurebond/infra_silver_Issue_Circulars.html and read carefully the Issue Circular and Programme Circular.
